General Comments: Jim Bielecki reports: "A bit of history here. This stand, twenty years back had a lot of mature white birch that Garlock wanted to regenerate. We did a shelterwood and scarified the area with our JD 740 skidder w/anchor chains. The scarification actually worked quite well, but the elk moved into the area and pretty well annihilated any and all white birch regen. Check FTP C54-462 for more info."
