comnts Fmd : some hills but all seems harvestable														
3	Q6	F1	13	70	8	70	45	mixed swamp conifer	immature	N		not scheduled	0	
<u>Treatment Limiting Factors:</u> Water quality/bmps														
comnts Fmd : Most of this would be the river buffer.														
4	L1	L1	25			0		lowland brush	nonstocked	N		not scheduled	0	
comnts Fmd : T.here are some trees but mostly it is low														
5	T9	F1	16	70	14	120	50	tamarack	mature	Y		10-19 years	0	
<u>Treatment Limiting Factors:</u> Delayed treatment for age/size class diversity Other special wildlife habitat consideration (desc. In comments)														
comnts Fmd : I would like to hold this stand because most of the surrounding area with some trees in it has been harvested. Ours is about the only standing timber in the area... the rest is A3, or Q3 or tag alder or Larch 3.														
6	L1	L1	31			0		lowland brush	immature	N		not scheduled	0	
7	M6	S1	8		10	80	55	northern hardwood	unevenaged	N		20-29 years	0	
comnts Fmd : This stand makes you wonder what was all around that is cut now.														
8	F6	F1	2	70	10	70	45	spruce-fir (uplands-including upland black spruce)	immature	Y		not scheduled	0	
<u>Treatment Limiting Factors:</u> Water quality/bmps														
comnts Fmd : this has wet spots but is not all wet but is a buffer along the Net River.														
9	L1	L1	35			0		lowland brush	nonstocked	N		not scheduled	0	
comnts Fmd : Lots of Tag Alder!!!														
10	A6	F1	27	80	10	80	55	aspen (upland)	mature	Y	final harvest	within 0-9 years	1	
<u>Treatment Limiting Factors:</u> Road needed (resources not presently available)														
comnts Fmd : There is a road to the edge of this property but it is surrounded by private land and access will possibly be a problem but if we can get access we will cut it with a BMP buffer. .														
11	A1	F1	1	7	1	0	55	aspen (upland)	immature	N		40-49 years	0	
comnts Fmd : I belive this cut was done by someone else but looks like ours according to the photo.

<p><u>Treatment Limiting Factors:</u> Other special wildlife habitat consideration (desc. In comments) Blocked by other physical obstacle Adjacent landowner denies access</p> <p>comnts Fmd : this is an awesome stand just to have along the river ...It is basically a buffer and is not really big enough besides that to warrant having someone deal with the railroad tracks and access. The White Pine are plentiful and the deer trails are also.</p>

22	M9	M2	63		18	120	60	northern hardwood	unevenaged	Y	selection	within 0-9 years	1	
<p>comnts Fmd : Access is limited here but we have been let through in the past. Steep hill toward river but could be operable ...Might want to keep the harvest line at the top of the hill.</p>

<u>Treatment Limiting Factors:</u>														
Inadequate volume due to small acreage														
Blocked by other physical obstacle														
comnts Fmd : this doesn't really meet the criteria to cut but for the most part is too small to fight for the access. There are many landowners who we would have to get permission from and the volume would not be worth the effort.														
33	M5	M1	4			10	60	northern hardwood	unevenaged	N		not scheduled	0	
34	C5	F1	9	105	8	60	45	cedar	mature	N		not scheduled	0	
<u>Treatment Limiting Factors:</u>														
Blocked by other physical obstacle														
Water quality/bmps														
comnts Fmd : This again is small volume for all the trouble to get access and a long way to go. Also, it is cedar and we have trouble with regeneration and it could be considered part of the BMP because the rest if tag alder.
