Stand	Cover Type-Size Dnsty	Under Story-Stkng Level	Acrs	Age	avg. D B	Tot. BA	Site Indx	Mgt Obj	Condition	Silv. Criteria Met?	Method Cut	Trtmt. Period	Harvest Priority	Cultural Need
1	A2	F1	63	14	3	0	55	aspen (upland)	immature	N		within 0-9 years	0	planting
comnts Fmd : A lot of this stand has no regeneration in it and in looking back at the records, it was a birch stand and did not all regenerate to aspen as there wasn't enough aspen in the stand to begin with. The soil supports red pine, white pine and white spruce so that might be an option to plant in holes of which there are lots.														
2	Q6	S1	8	70	8	80	40	mixed swamp conifer	mature	N		not scheduled	0	
comnts Fmd : SAVE FOR WINTERING DEER WET SWAMP														
3	A3	F1	51	18	3	0	55	aspen (upland)	immature	N		40-49 years	0	
comnts Fmd : has openings from lack of regeneration some white pine														
4	A3	F1	47	15	3	0	55	aspen (upland)	immature	N		40-49 years	0	
comnts Fmd : this is not really a fully stocked stand but much better than stand 1.														
5	F6	F1	14	85	10	90	75	spruce-fir (uplands-including upland black spruce)	old growth (potential or actual)	Y		not scheduled	0	
<u>Treatment Limiting Factors:</u> Water quality/bmps														
comnts Fmd : this is the buffer (bmp) for the east side of the Net river. This will not be cut for best management purposes and can be considered Old Growth														
6	G0	G0	7		0	0	60	grass	nonstocked	N		not scheduled	0	
comnts Fmd : ACCESS SITE FOR NET RIVER														
7	F6	F1	4	85	10	100	75	spruce-fir (uplands-including upland black spruce)	old growth (potential or actual)	Y		not scheduled	0	
<u>Treatment Limiting Factors:</u> Water quality/bmps														
comnts Fmd : this stand is the buffer for the east side of the Net river. It is the best management practice and will be considered Old Growth as it will not be Harvested.														
8	M6	M1	35		10	90	60	northern hardwood	unevenaged	N		10-19 years	0	
comnts Fmd : some hemlock and highland cedar and lots of regen...because it was cut to a lower Basal Area														
9	Z0	Z0	31		0	0		water	nonstocked	N		not scheduled	0	
comnts Fmd : NET RIVER														
10	L1	L1	15		0	0		lowland brush	nonstocked	N		not scheduled	0	
comnts Fmd : Robinson Creek and tag alder														
11	A5	F2	3	43	6	60	55	aspen (upland)	immature	N		20-29 years	0	

* See "Compartment Packets Glossary of Terms" document link on web site for further descriptions and code definitions.

Stand	Cover Type-Size Dnsty	Under Story-Stkng Level	Acrs	Age	avg. D		Site Indx	Mgt Obj	Condition	Silv. Criteria Met?	Method Cut	Trtmt. Period	Harvest Priority	Cultural Need
					B H	Tot. BA								
12	F 6	F 1	41	43	10	100	55	spruce-fir (uplands-including upland black spruce)	two aged	N	final harvest	within 0-9 years	1	
comnts Fmd : This is a two aged stand but since we are cutting the stands to the north, and access is difficult, it would be good to cut this too as it has a majority of mature trees in it. It is very rocky ground.														
13	Q 6	S 1	16	70	8	90	40	mixed swamp conifer	immature	N		20-29 years	0	
14	R 9	S 3	14	108	14	150	75	red pine	immature	Y		10-19 years	0	
<u>Treatment Limiting Factors:</u>														
Water quality/bmps Influence zones														
comnts Fmd : Stand is in good condition, a little of it has blown down from the 2005 windstorm. The stand has an understory of spruce and balsam If we want pine here, which grows quite well here, we need to remove the undrstory but it is too late to burn because it is to high and would damage the pine if burned. I believe any other type of removal would be time consuming and expensive. 1/3 of the stand was thinned in the last entry but no unerstory species were removed as they are unmerchantable.														
Wld : Need to keep for winter deer cover														
15	E 6	F 1	9		6	90	50	swamp hardwoods	immature	N		not scheduled	0	
comnts Fmd : LEAVE FOR BUFFER ALONG WEST SIDE OF NET RIVER														
16	L 1	L 1	7			0		lowland brush	nonstocked	N		not scheduled	0	
comnts Fmd : This is low and Robinson Creek														
17	A 5	F 2	42	43	6	60	75	aspen (upland)	immature	N		within 0-9 years	0	planting
comnts Fmd : This stand is very "off site" and I think pine should be underplanted and where it is open in the stand ,red pine should be planted since it is 9 sticks tall to the north and the soil is the same in this stand.														
18	F 5	F 1	6	43	6	50	55	spruce-fir (uplands-including upland black spruce)	immature	N		20-29 years	0	
19	M 5	F 1	5		10	60	55	northern hardwood	unevenaged	N		20-29 years	0	
comnts Fmd : this stand seemed to be cut through when they were cutting the aspen.														
20	M 5	F 1	4		10	70	55	northern hardwood	unevenaged	N		30-39 years	0	
21	M 5	F 1	2		10	60	55	northern hardwood	unevenaged	N		20-29 years	0	
22	V 0	V 0	3			0		bog or muskeg	nonstocked	N		not scheduled	0	
comnts Fmd : There is an amazing but small stand of pine on the east hillside of this bog														
23	A 2	L 1	5	15	3	0	55	aspen (upland)	nonstocked	N		40-49 years	0	
comnts Fmd : This is part of stand 4 but is wet and full of tag alder so if different than stand 4.

Stand	Cover Type-Size Dnsty	Under Story-Stkng Level	Acrs	Age	avg. DBH	Tot. BA	Site Indx	Mgt Obj	Condition	Silv. Criteria Met?	Method Cut	Trtmt. Period	Harvest Priority	Cultural Need
24	E 6	F 1	13		6	70	50	swamp hardwoods	immature	N		not scheduled	0	
<p><u>Treatment Limiting Factors:</u> Water quality/bmps</p> <p>comnts Fmd : this is an E stand with a buffer along the river of birch and spruce and such.</p>														
25	R 9	F 1	1	108	12	80	75	red pine	immature	Y		not scheduled	0	
<p><u>Treatment Limiting Factors:</u> Scenic values/visual values</p>														
26	A 3	F 1	5	15	3	0	55	aspen (upland)	immature	N		40-49 years	0	
27	L 1	L 1	3			0		lowland brush	nonstocked	N		not scheduled	0	
28	Z 0	Z 0	3			0		water	nonstocked	N		not scheduled	0	
<p>comnts Fmd : a water body (creek like) with tag alder</p>														
29	F 3	F 1	6	10	3	0	50	spruce-fir (uplands-including upland black spruce)	immature	N		50-59 years	0	
<p>comnts Fmd : This is all small stuff and has open spots</p>														
30	F 6	F 1	13	73	8	80	50	spruce-fir (uplands-including upland black spruce)	mature	Y		not scheduled	0	
<p><u>Treatment Limiting Factors:</u> Water quality/bmps</p> <p>comnts Fmd : There is a strange combination of trees here but it is buffer. There are some younger aspen pockets mixed in and leeks are part of the ground cover. Pretty along the river. Good landing spot.</p>														
31	F 6	F 1	10	73	8	100	50	spruce-fir (uplands-including upland black spruce)	mature	Y		not scheduled	0	
<p><u>Treatment Limiting Factors:</u> Water quality/bmps</p>														
32	L 1	L 1	13			0		lowland brush	nonstocked	N		not scheduled	0	
<p>comnts Fmd : this has real steep sides in part and is low where the tag alder is.</p>														
33	Q 6	S 1	10	70	8	80	40	mixed swamp conifer	mature	N		not scheduled	0	
34	A 3	F 1	22	18	3	0	55	aspen (upland)	immature	N		40-49 years	0	
<p>comnts Fmd : has openings from lack of regeneration and some white pine</p>														
400	G 0	G 0	21		0	0	75	grass	nonstocked	N		not scheduled	0	
<p>comnts Fmd : this IS an opening but is very slowly being filled in and has jack pine , black spruce and some red and white pine in it. Especially along the road, the conifers are very thick but still pretty small.</p>
