<p><u>Treatment Limiting Factors:</u> Delayed treatment for age/size class diversity Blocked by other physical obstacle Inadequate volume due to small acreage</p>														
<p>comnts Fmd : This stand is small and probably not worth harvesting at this time because the pipeline is steep for a logging truck to haul and there is not a good road to get to the sale.</p>

<u>Treatment Limiting Factors:</u> Cedar or Hemlock cutting restraints														
comnts Fmd : This is a large cedar stand and is part of a deeryard. There is a nice meandering creek running through this stand which is a tributary of the Two mile creek.														
14	A3	G0	116	16	1	0	60	aspen (upland)	immature	N		50-59 years	0	
comnts Fmd : There are some oak groupings present here and a few jack pine. Also, some large red and white pine. 1-2 inches tall and 20 feet tall.

<u>Treatment Limiting Factors:</u> Regeneration technology inadequate Influence zones														
comnts Fmd : Since stand 22 was cut and was in part, a Q stand it woud be good to wait til it grew before cutting any more plus this stand is a nice buffer to Two mile creek which is a good trout stream

<u>Treatment Limiting Factors:</u> Regeneration technology inadequate Water quality/bmps														
comnts Fmd : some of this stand is along the Two mile Creek which is considered a good trout stream.														
20	R9	F1	5		18	100	55	red pine	unevenaged	N		10-19 years	0	
comnts Fmd : A few small areas have a great amount of diversity but overall this is mostly just red pine and some white pine. There is one oak here also. The stand runs downhill to the cedar swamp.														
21	L1	L0	10		0	0		lowland brush	nonstocked	N		not scheduled	0	
comnts Fmd : tag alder here.														
22	A3	F1	34	20	2	0	55	aspen (upland)	immature	N		40-49 years	0	
comnts Fmd : The south part of this stand was obviously a Q stand that was cut and regenerated to aspen and balm of gilead with lots of balsam and lots of tag alder.and therefore I made it a separate stand. There is more conifer regeneration along the buffer because of the seed source was there.

Other special wildlife habitat consideration (desc. In comments)														
comnts Fmd : This pine is real nice and the aspen was cut out of it. The aspen will grow back and should remain a diverse stand. Also, the pine is good deer habitat.
