comnts Fmd : This stand is very, very diverse. It has areas with planted red pine, regenerated, white birch, aspen, white pine, white and black spruce, balsam and lots of tamarack. Some is more thickly regenerated, some is less so it makes it a very diverse, and yet productive area. Most are 10 - 30 feet tall.

<u>Treatment Limiting Factors:</u> Too steep Inadequate volume due to low stocking/small diameter/etc.														
comnts Fmd : This stand is hard to access but can be through Plum Creek but a lot of it has been blown down and it is very steep so I don't think it is worth getting to harvest because it is not that large. Good view to Bates Lake area from here.
