Stand	Cover Type-Size Dnsty	Under Story-Stkng Level	Acrs	Age	avg. D		Site Indx	Mgt Obj	Condition	Silv. Criteria Met?	Method Cut	Trtmt. Period	Harvest Priority	Cultural Need
					B	Tot. BA								
1	F 6	F 2	6	88	8	120	55	spruce-fir (uplands-including upland black spruce)	mature	Y		not scheduled	0	
<p><u>Treatment Limiting Factors:</u> Neighbor Influence zones</p> <p>comnts Fmd : THIS IS A DRY SITE. ASPEN, MAPLE AND BIRCH ARE FOUND IN THE NORTHEAST CORNER BUT THE BULK OF THE STAND IS UPLAND SPRUCE/FIR WITH SCATTERED WHITE PINE. THE NEIGHBORS WERE EXTREMELY CONCERNED THAT WE MIGHT CUT THIS. DUE TO THEIR CONCERN IN ADDITION TO THE COUNTY ROAD INFLUENCE ZONE I BELIEVE WE SHOULD NOT TREAT THIS STAND.</p>														
2	Q 6	F 2	10	68	9	80	35	mixed swamp conifer	immature	N		not scheduled	0	
<p>comnts Fmd : THIS STAND IS WET WITH POCKETS OF WIND THROWN TIMBER. HARDWOOD IS REGENERATING QUITE WELL IN THE CANOPY GAPS.</p>														
3	Q 6	Q 2	13	68	7	140	40	mixed swamp conifer	immature	N		not scheduled	0	
<p>comnts Fmd : THIS STAND IS NOT CURRENTLY WET LIKE STAND #2 IS. SOME AREAS HAVE AN EXTREMELY DENSE CONIFER UNDERSTORY.</p>														
4	P 4	P 2	31	78	7	30	40	balsam poplar & swamp aspen and swamp white birch	low quality	Y		not scheduled	0	
<p><u>Treatment Limiting Factors:</u> Too wet Inferior quality Inadequate volume due to low stocking/small diameter/etc.</p> <p>comnts Fmd : THIS IS A WET STAND WITH A LOT OF BLOW DOWN. THERE IS VERY LITTLE CONIFER COMPONENT IN THE OVERSTORY OF THIS STAND. THE UNDERSTORY IS EXTREMELY THICK.</p>														
5	A 6	F 2	6	78	9	160	60	aspen (upland)	mature	Y	final harvest	within 0-9 years	3	
<p><u>Treatment Limiting Factors:</u> Blocked by other physical obstacle</p> <p>comnts Fmd : THIS IS A VERY NICE STAND OF DENSE MATURE ASPEN. THERE IS ALSO A NOTABLE SUGAR MAPLE COMPONENT IN THIS STAND. UNFORTUNATLY THERE IS NO WAY TO REACH THIS STAND FOR COMMERCIAL HARVESTING. WILDLIFE WOULD LIKE TO SCHEDULE A NON-COMMERCIAL HABITAT CUT. THE RESULTING STAND WOULD BE A MIX OF ASPEN AND HARDWOOD ALONG WITH ANY FIR REGEN THAT MIGHT BE LEFT FOLLOWING THE HARVEST. ***DUE TO THE SMALL ACREAGE THERE IS NO NEED TO PLAN FOR RETENTION IN THIS STAND***</p>														
6	P 4	P 2	16	78	7	30	40	balsam poplar & swamp aspen and swamp white birch	low quality	Y		not scheduled	0	
<p><u>Treatment Limiting Factors:</u> Too wet Inferior quality Inadequate volume due to low stocking/small diameter/etc.</p> <p>comnts Fmd : THIS IS A WET STAND WITH A LOT OF BLOW DOWN. THERE IS VERY LITTLE CONIFER COMPONENT IN THE OVERSTORY OF THIS STAND. THE UNDERSTORY IS EXTREMELY THICK.</p>														
7	P 5	P 2	33	78	8	50	45	balsam poplar & swamp aspen and swamp white birch	mature	Y		not scheduled	0	
<p><u>Treatment Limiting Factors:</u> Too wet Inferior quality</p> <p>comnts Fmd : THIS STAND IS STILL WET BUT NOT NEARLY AS BAD AS STAND #6 ADJACENT TO THE NORTH. THERE IS MUCH MORE MERCHANTABLE ASPEN IN THIS STAND AS A RESULT. THE STAND IS INACCESSIBLE THOUGH FROM A COMMERCIAL HARVESTING STANDPOINT.</p>														

* See "Compartment Packets Glossary of Terms" document link on web site for further descriptions and code definitions.

Stand	Cover Type-Dnsty	Under Story-Stkng Level	Acrs	Age	avg.		Site Indx	Mgt Obj	Condition	Silv. Criteria Met?	Method Cut	Trtmt. Period	Harvest Priority	Cultural Need
					D	B								
8	M 5	F 2	75	74	8	60	55	northern hardwood	mature	N		not scheduled	0	
comnts Fmd : THIS IS A DRY STAND FOR THE MOST PART, HOWEVER, THERE ARE LOW POCKETS OF "E" TYPE SCATTERED THROUGHOUT. THERE IS SCATTERED SUGAR MAPLE MIXED IN ON THE UPLANDS BUT IT IS OF VERY LOW QUALITY.														
9	A 6	F 2	11	78	9	150	60	aspen (upland)	mature	Y	final harvest	within 0-9 years	3	
<u>Treatment Limiting Factors:</u> Adjacent landowner denies access Blocked by other physical obstacle														
comnts Fmd : THIS IS VERY NICE ASPEN. UNFORTUNATLY THERE IS NO FEASIBLE WAY TO REACH THIS STAND FOR COMMERCIAL HARVESTING. WILDLIFE WOULD LIKE TO SCHEDULE A NON-COMMERCIAL HABITAT CUT. THE RESULTING STAND WOULD BE A MIX OF ASPEN AND HARDWOOD ALONG WITH ANY FIR REGEN THAT MIGHT BE LEFT FOLLOWING THE HARVEST. ***DUE TO THE SMALL ACREAGE THERE IS NO NEED TO PLAN FOR RETENTION IN THIS STAND***														
10	C 6	Q 2	15	68	8	90	35	cedar	immature	N		not scheduled	0	
comnts Fmd : THIS IS A WET STAND OF CEDAR. IT IS PATCHY IN NATURE WITH POCKETS OF LOWER DENSITY TIMBER MIXED IN WITH AREAS OF SOLID CEDAR.														
11	U 0	G 0	3		0	0		upland brush	nonstocked	N		not scheduled	0	
comnts Fmd : AERIAL PHOTOS INDICATE THIS ONCE WAS EITHER A PASTURE OR FARMLAND. IT IS SLOWLY FILLING IN WITH SCATTERED TAG ALDER, SPRUCE AND WHITE PINE.														
12	Q 4	E 2	109	78	8	20	30	mixed swamp conifer	sparse	Y		not scheduled	0	
<u>Treatment Limiting Factors:</u> Too wet Inadequate volume due to low stocking/small diameter/etc.														
comnts Fmd : THIS IS A MISERABLE STAND. IT IS VERY WET WITH A LOT OF BLOWDOWN. SOME OF THE CEDAR IS SHOWING SIGNS OF DIE BACK. THERE IS A HEAVY TANGLED UNDERSTORY OF HARDWOOD SAPPLINGS AND TAG ALDER.														
13	M 5	F 2	5	74	8	60	55	northern hardwood	mature	N		not scheduled	0	
comnts Fmd : THIS IS A LITTLE ISLAND OF HIGHER GROUND SURROUNDED BY WET STANDS.														
14	L 0	G 0	33		0	0		lowland brush	nonstocked	N		not scheduled	0	
comnts Fmd : STAND HAS DEAD STANDING TIMBER RESULTING FROM PAST BEAVER FLOODING. IT IS NOT FLOODED THOUGH AT THE PRESENT TIME.														
15	N 0	N 0	17		0	0		marsh	nonstocked	N		not scheduled	0	
comnts Fmd : THIS IS AN OLD BEAVER MARSH. WITH THE EXCEPTION OF A LARGE BEAVER LODGE IN THE NORTHEAST CORNER, THIS LOOKS FAIRLY DRY AND INACTIVE.														
16	E 5	L 0	3	74	9	60	45	swamp hardwoods	low quality	N		not scheduled	0	
comnts Fmd : THIS STAND DROPS OFF SLIGHTLY IN ELEVATION AS COMPARED TO STAND #17 TO THE EAST. AS A RESULT IT IS QUITE WET.														
17	A 6	F 1	6	78	9	100	60	aspen (upland)	mature	Y	final harvest	within 0-9 years	2	
<u>Treatment Limiting Factors:</u> Adjacent landowner denies access														
comnts Fmd : THIS IS A NICE STAND THAT SHOULD BE HARVESTED ASSUMING WE COULD GAIN ACCESS TO IT ACROSS THE ADJACENT PRIVATE PROPERTY. FISHERIES DOES NOT HAVE A CONCERN OVER THE CLOSE PROXIMITY OF THIS STAND TO AN OLD BEAVER FLOODING SO THEY APPROVED THE TREATMENT. IF IT IS CUT THE RESULTING STAND WOULD BE A MIX OF ASPEN AND HARDWOOD ALONG WITH ANY FIR REGEN THAT MIGHT BE LEFT FOLLOWING THE HARVEST. ***DUE TO THE NARROW ORIENTATION AND SMALL ACREAGE THERE IS NO NEED TO PLAN FOR RETENTION IN THIS STAND***														

* See "Compartment Packets Glossary of Terms" document link on web site for further descriptions and code definitions.

Stand	Cover Type-Dnsty	Under Story-Stkng Level	Acrs	Age	avg. DBH	Tot. BA	Site Indx	Mgt Obj	Condition	Silv. Criteria Met?	Method Cut	Trtmt. Period	Harvest Priority	Cultural Need
18	E 5	L 0	5	74	9	60	45	swamp hardwoods	low quality	N		not scheduled	0	
comnts Fmd : THIS IS A DISTINCT SWALE SURROUNDED BY HIGHER GROUND. IF THE ADJACENT STAND IS HARVESTED THIS WET STAND NEEDS TO BE EXCLUDED FROM THE SALE AREA DUE TO THE POTENTIAL FOR SEVERE RUTTING.														
19	A 6	F 1	25	78	9	100	60	aspen (upland)	mature	Y	final harvest	within 0-9 years	2	
<u>Treatment Limiting Factors:</u> Adjacent landowner denies access														
comnts Fmd : THIS IS A NICE STAND THAT SHOULD BE CUT IF WE COULD GAIN ACCESS TO IT ACROSS THE ADJACENT PRIVATELY OWNED LAND. THE STAND WILL BE PRESCRIBED AND THE NEIGHBORS CONTACTED IN AN ATTEMPT TO GAIN PERMISSION TO CROSS THEIR LAND. IF IT IS CUT THE RESULTING STAND WOULD BE A MIX OF ASPEN AND HARDWOOD ALONG WITH ANY FIR REGEN THAT MIGHT BE LEFT FOLLOWING THE HARVEST. ***RETENTION - LEAVE A FEW SMALL UNCUT ISLANDS ESPECIALLY IN THOSE AREAS OF THE STAND WITH HEAVIER CONCENTRATIONS OF MAPLE***														
400	G 0	G 0	1		0	0		grass	nonstocked	N		not scheduled	0	
comnts Fmd : THIS IS A NATURAL OPENING THAT USE TO BE MUCH BIGGER. IT IS NOW FILLING IN QUITE RAPIDLY WITH CONIFERS.														
401	G 0	G 0	1		0	0		grass	nonstocked	N		not scheduled	0	
comnts Fmd : THIS IS A NATURAL OPENING THAT USE TO BE MUCH BIGGER. IT IS NOW FILLING IN QUITE RAPIDLY WITH CONIFERS.
