1	C 6	L 0	102	96	6	120	29	cedar	mature	N		not scheduled	0	
comnts Fmd : Open and flowing water on the north and west edge. Stand is mostly Cedar but there are a few large strips and pockets of black spruce. Heavy tag alder, and black spruce understory. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
2	S 4	S 2	1	29	7	10	46	black spruce-swamp	sparse	N		not scheduled	0	
comnts Fmd : Strip/shelterwood, left spruce. Found no cedar regeneration. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
3	S 4	S 2	3	29	7	10	46	black spruce-swamp	sparse	N		not scheduled	0	
comnts Fmd : Strip/shelterwood, left spruce. Found no cedar regeneration. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
4	C 4	Q 2	19	96	6	30	29	cedar	low quality	N		not scheduled	0	
<u>Treatment Limiting Factors:</u> Deer yards														
comnts Fmd : Lots of 3-4" dia 20-25 feet tall black spruce. Cedar is shorter but same dia. Height average 12-16', 96 years old. Dead tops wet and open, tag alder everywhere. Understory is a mix of spruce, tramrack, tag alder. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
5	Q 6	L 0	11	96	6	120	36	mixed swamp conifer	mature	Y		not scheduled	0	
<u>Treatment Limiting Factors:</u> Deer yards														
comnts Fmd : Just walked edges of this stand did not visit the interior parts of this stand, used air photo interpolation and old data. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
6	C 6	L 0	53	96	8	150	28	cedar	mature	N		not scheduled	0	
comnts Fmd : Lots of down and dead. Areas of tag alder and black spruce. Plenty of wet areas. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
7	C 6	L 0	7	96	6	70	27	cedar	mature	N		not scheduled	0	
comnts Fmd : Small dia trees, very high water table, saturated soil, marshy ground. Wet- tag alder understory. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
8	T 2	L 0	52	18	1	10	28	tamarack	immature	N		not scheduled	0	
comnts Fmd : Stand final harvested from 1984-1988, winter time only. Open water, heavy skid tracks 2-feet deep. Did find one cedar seedling appears to have been a cedar top left in the skid trails. Very nice tamarack regen. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
9	C 6	L 0	7	96	6	70	27	cedar	mature	N		not scheduled	0	
comnts Fmd : Small dia trees, very high water table, saturated soil, marshy ground. Wet- tag alder understory. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."

					D B	Tot. BA	Site Indx							
10	Q 2	L 0	11	18	2	20	28	mixed swamp conifer	immature	N		not scheduled	0	
comnts Fmd : Stand final harvested from 1984-1988, winter time only. Was part of stand 8, more spruce and cedar was left. Open water, heavy skid tracks 2-feet deep. Lots of tag alder. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
11	C 5	L 2	1	96	6	40	26	cedar	mature	N		not scheduled	0	
comnts Fmd : plenty of small dia cedar (3-4 inches). A small pocket of cedar left when surrounding stand was final harvested. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
12	C 6	S 1	372	96	8	100	28	cedar	mature	N		not scheduled	0	
comnts Fmd : Lots of down and dead. Areas of tag alder and black spruce. Plenty of wet areas. Scattered and a few small pocket of white pine, with some regen. More Black spruce in the middle of stand. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
13	S 5	S 1	17	28	6	50	29	black spruce-swamp	immature	N		not scheduled	0	
comnts Fmd : Changes to more spruce and a little cedar as you go west. The (99) species is a mix of (TA, BA, PB). "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
14	E 2	E 2	19	22	12	20	50	swamp hardwoods	immature	N		not scheduled	0	
comnts Fmd : Standing dead paper birch, scattered black spruce and tramack. A small pocket of cedar, a few oak seedling which have been browsed heavily. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
15	C 6	L 0	87	96	8	150	28	cedar	mature	N		not scheduled	0	
comnts Fmd : Lots of down and dead. Areas of tag alder and black spruce. Plenty of wet areas. Parts of a pathway/ORV trail extends into stand 12 this trail is being kept open by someone brushing. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
16	W 9	M 1	13	106	18	190	54	white pine	sparse	Y		not scheduled	0	
<u>Treatment Limiting Factors:</u> Delayed treatment for age/size class diversity														
comnts Fmd : Lots of deer signs stand just on the edge of the swamp, including beds, browse, and trails. A very unique for this compartment. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
17	C 4	L 2	272	96	5	20	26	cedar	mature	N		not scheduled	0	
comnts Fmd : Dead tops, wet and open areas, flowing stream. Cedar average height 12-16 feet, black spruce average height 25-30 feet tall, with a lot of 3-4 inch dia trees. Found six shooting lanes and a 2" round pipe stuck into the ground. Pathway/ORV trail is being kept open by whom every is using these shooting lanes. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
18	C 6	F 3	95	96	7	120	29	cedar	mature	N		not scheduled	0	
comnts Fmd : Balsam and tag alder understory. A lot of 3" dia 20-25' tall spruce. Open water with flow, and a few blow-down area heavy black spruce regen. Did not find and cedar regeneration. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
19	C 6	S 1	106	98	7	110	29	cedar	mature	N		not scheduled	0	
comnts Fmd : From the east, start off dry ground but turns wet quick with spruce understory with tag alder. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."

					D B H	Tot. BA	Site Indx							
20	T 3	T 3	20	18	1	0	29	tamarack	immature	N		not scheduled	0	
comnts Fmd : Found three cedar seedling in skid trail, with lots of tag alder, open creek. Highbush cranberry, and red osier dogwood heavy browse on the dogwood. West side a few cedar were left would have to make an effort of be in plot data. Wonderful tramarck and black spruce regeneration. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
21	C 6	S 1	2	19	7	150	29	cedar	immature	N		not scheduled	0	
comnts Fmd : Stand was part of stand 20, but was not cut. Found old paint boundary. Over-all this is some of the best cedar I found. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
22	C 5	S 1	1	96	7	50	27	cedar	immature	N		not scheduled	0	
comnts Fmd : Stand was part of stand 20, but was not cut. Stream flows throught this stand. Cedar understory 3-4 dia. (90 years old). "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
25	C 6	S 3	1	19	7	110	29	cedar	immature	N		not scheduled	0	
comnts Fmd : Stand was part of stand 20, but was not cut. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
26	W 9	M 1	24	106	18	140	54	white pine	sparse	Y		not scheduled	0	
<u>Treatment Limiting Factors:</u> Delayed treatment for age/size class diversity Influence zones														
comnts Fmd : Standing dead paper birch, scattered black spruce and tramack. A small pocket of cedar, a few oak seedling which have been browsed heavily. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
27	E 5	L 0	34	96	7	60	47	swamp hardwoods	immature	Y		not scheduled	0	
<u>Treatment Limiting Factors:</u> Influence zones Deer yards														
comnts Fmd : "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
28	C 6	S 1	71	96	7	170	28	cedar	mature	N	shelterwood- prep	within 0-9 years	2	
<u>Treatment Limiting Factors:</u> Deer yards Too wet														
comnts Fmd : Lots of down and dead. Not as wet as some of the other stands, but there are pockets of heavy saturated soil with black spruce regeneration and tag alder. Nice straight stem, with no visible regeneration of cedar. A little wetter area as you go east. Of all the stand I have looked at I would think of thinning this one stand. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value." WITHIN STAND DO VARIABLE RETENSION (DO ISLANDS WITH 80-100 BA ALONG WET AREA AND THE EDGE) MARK THE REST TO 60 BA.														
29	S 4	S 2	1	35	7	10	46	black spruce-swamp	sparse	N		not scheduled	0	
comnts Fmd : Strip/shelterwood, left spruce. Found no cedar regeneration. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."														
30	S 4	S 2	2	35	7	10	46	black spruce-swamp	immature	N		not scheduled	0	
comnts Fmd : Strip/shelterwood, left spruce. Couple of red and white pine on the west edge of stand. Lots of tag alder. Found no cedar regeneration. "SCA- The Seven Mile Swamp, It is considered a very valuable deeryard and has been identified by both Wildlife and Forest, Mineral, and Fire Management, as a separate management compartment with wildlife being the key value."
