

	Level 4 Cover Type	Size Density	Acres	Stand Age	BA Range	General Comments:
2	42290 - Natural Mixed Pine	High Density Pole	3.9	58	51-80	mixed stand of red p, jp and oak. variable density of each species, areas where red pine are more prevalent as well as spots where jp dominate. jp is smaller and denser in eastern portions of stand.
3	4191 - Mixed Upland Deciduous with Conifer	Medium Density Pole	22.0	Uneven Age	1-50	very mixed stand w/ some areas that look to have had overstory removed. aspen/oak are dominant w/ some areas where jp is very numerous. looks to be 2-aged and multistoried.
4	42290 - Natural Mixed Pine	High Density Sapling	2.9	16	1-50	mixed stand of red, white and jack pine. looks like overstory was removed leaving intermediates and in open areas, stand has regenerated with natural pine along with some oak/aspen.
6	42260 - Natural Pine, Mixed Deciduous	Medium Density Pole	17.6	25		mixed stand w/ jp dominant. sweetfern is very thick. rp are scattered.
7	42120 - Planted Jack Pine	High Density Pole	4.7	51		mixed stand of jack pine with some aspen and occasional oak. jack pine is fair quality. may want to treat by removing jack greater than 4" dbh and all aspen. old railroad grade runs through center of stand.
8	4125 - Black, N. Pin Oak	High Density Sapling	4.7	10		stand regenerating well, mixtyre of oak/jp with a few overstory oak.
9	42220 - Natural Jack Pine	Medium Density Pole	15.7	30		Stand swapped from Non-Forested to Forested. variable density jack pine stand. open pockets throughout. seems to be 2-aged, possibly natural seeded/regenerated
10	42120 - Planted Jack Pine	High Density Pole	18.0	39		jack pine w/ some pin oak mixed in. mnot very great qual but is growing fair.
11	4191 - Mixed Upland Deciduous with Conifer	High Density Sapling	7.0	10		mixed stand w/ osk, jp and aspen present in about = numbers.
12	4199 - Other Mixed Upland Deciduous	High Density Sapling	87.2	8		mixed stand w/ aspen and oak dominant. lots of cherry present as well, mainly around perimeter. some overstory along interstate that was left as buffer.
13	4191 - Mixed Upland Deciduous with Conifer	High Density Sapling	15.0	17		mixed stand of oak/aspen with a fair amount of jp. small, more open area in center portion of stand. some overstory white and red pine, concentrated at perimeter.
14	4131 - Aspen, Oak	High Density Sapling	7.3	18	1-50	New stand added. oak/aspen/jp stand growing fairly well w/ some openings throughout. provides nice buffer along railroad grade for harvests further east.
15	4133 - Aspen, Mixed Pine	Medium Density	11.3	3		Stand swapped from Non-Forested to Forested. stand was harvested in 2006 with red and white pine being left along with pockets of oak regen. stand is converting to aspen with thick regen in most areas of stand. some red maple and oak regen as well.

	Level 4 Cover Type	Size Density	Acres	Stand Age	BA Range	General Comments:
16	4124 - Red with White Oak	High Density Log	29.4	81	51-80	oak stand that was shelterwood harvested last yoe oak is fair quality and a mix of red and white. understory is red maple, oak and aspen, all medium to high density. a few pockets were left as rerention and have higher density and less regeneration.
17	4130 - Aspen	High Density Sapling	48.8	10		aspen stand regenerating well w/ some oak and red maple in the canopy.
18	4130 - Aspen	High Density Pole	2.3	40		Stand swapped from Non-Forested to Forested. aspen stand with hawthorn understory. aspen is fair quality.
19	4119 - Mixed Northern Hardwoods	High Density Pole	58.4	32	51-80	mixed stand w/ red maple poles being dominant with red and white oak present in descent numbers along w/ some red pine and aspen clones throughout. oak and rp more common in some pockets. seems as though this has resulted from a harvest in which aspen and red maple were removed leaving oak and rp.
20	4125 - Black, N. Pin Oak	Medium Density Log	3.9	80	51-80	mixed oak stand w/ variable density. lots of red maple in understory along with occasional red abd jack pine as well as some aspen in open areas, mainly located in southern parts of stand.
21	4122 - Oak, Pine	High Density Pole	10.3	30	1-50	New stand added. similar to 16B however red pine are present as are jp and size is slightly larger overall.
22	4130 - Aspen	High Density Sapling	9.6	15	1-50	younger aspen stand with some scattered laarger individuals along withh occasional oak in the 8" range.
23	42210 - Natural Red Pine	Low Density Log	71.3	40		Stand swapped from Non-Forested to Forested. natural red pine left following recent harvest occupies most of overstory, some white pine as well. red maple and mixed oak occupy intermediate structure. understory contains mainly oak and red maple regen.
24	42210 - Natural Red Pine	Low Density Log	26.1	62	1-50	low density red pine overstory left after recent harvest. red pine doing well with some intermediate red maple and oak sap/poles
25	42211 - Natural Red Pine, Mixed Deciduous	Medium Density Log	44.2	65	1-50	red pine overstory with intermediate oak and red maple throughout, all of which were left following recent harvest

Stand	Cover Type	Acres	Gen Cmts:
1	310 - Herbaceous Openland	0.9	small grassy opening in valley, most likely influenced by frost. some tree seedlings/saps throughout in low numbers.
5	310 - Herbaceous Openland	3.6	cherry savanna w/ aspen near perimeter and occasional jp seedlings.
