<p>comnts Fmd : M5F4. Stand was schedule with stand 8 and originally sold in 1999. Sale was taken back by the state and reassigned in 2004. It is comprised of red maple poles with scattered spruce, fir, and cedar. Paint on the trees has faded but still visiable. Contract marked by Penegor in 1998, - stand is to be select cut with stand 8.</p> <p>Wld : Hemlock trees are marked with orange paint - need to be excluded from sale. Patchy lowlands within stand with cedar, hemlock, and white pine as overstory. Yellow birch seems to be marked fairly heavy. Underplant hemlock and/or white pine after cutting completed. Leave all cedar, white pine, hemlock and white spruce.</p>

<p>comnts Fmd : M6M7, Cut in 1991, the stand still has plenty of room for crown development. Regeneration from the 1991 sale is very good. The stand has quite variable, including topography, and contains a small ridge or hill top of almost pure sugar maple sawtimber. There is a good distribution of large diameter trees, including yellow birch, soft maple, and hard maple. Hemlock and cherry are also present in the stand. The south peninsula dips to lowlands and contains more soft maple and fir.</p>
