Stand	Cover Type-Size Dnsty	Under Story-Stkng Level	Acrs	Age	avg.			Mgt Obj	Condition	Silv. Criteria Met?	Method Cut	Trtmt. Period	Harvest Priority	Cultural Need
					D	B	Tot. BA							
1	M 6	M 3	86	8	90	60	northern hardwood	two aged	N		10-19 years	0		
<p>comnts Fmd : Evenaged stand of well stocked hardwood poles and saplings. There is a good scattering of large red oak sawtimber trees and an occasional cherry, white birch, and yellow birch. The Bass Lake Motorcycle trail runs through the western portion of the stand. Terrain is quite hilly.</p> <p>Wld : Oak seedlings and saplings. Oak saplings 8 feet tall. Few white pine saplings.</p>														
2	X 0	X 0	8		0	55	other non-stocked or non-forest or non-productive	nonstocked	N		not scheduled	0		
<p>comnts Fmd : ELF LINE</p>														
3	A 6	A 3	19	46	7	70	60 aspen (upland)	immature	N		10-19 years	0		
<p>comnts Fmd : Small aspen poles over aspen saplings and hazelnut. Scattered red oak sawtimber and occasional cherry.</p> <p>Wld : White birch poles present. White spruce also in overstory.</p>														
4	A 3	X 0	69	6	1	0	71 aspen (upland)	immature	N		40-49 years	0		
<p>comnts Fmd : CUT SUMMER 2002, PERMIT # 010-00-01</p> <p>Wld : Scattered 1 foot tall oak seedlings. Infrequent red pine sawtimber, white pine poletimber, and red oak poletimber.</p>														
5	A 6	A 3	75	36	7	70	70 aspen (upland)	immature	N		20-29 years	0		
<p>comnts Fmd : Small aspen poles over aspen saplings and hazelnut. Scattered red oak and cherry.</p> <p>Wld : Scattered 1 foot tall oak seedlings. Few white spruce poles.</p>														
6	M 6	M 1	29		9	100	50 northern hardwood	unevenaged	N		10-19 years	0		
<p>comnts Fmd : Poorer hardwood site with twins and triplets. Stand also contains scattered white birch, and red oak. Fairly heavy ironwood regeneration. Terrain is fairly steep with ridges and valleys. Bass Lake Motorcycle trail runs thru this stand.</p>														
7	Z 0	Z 0	4			0	water	nonstocked	N		not scheduled	0		
<hr/>														
8	V 0	V 0	8			0	10 bog or muskeg	old growth (potential or actual)	N		not scheduled	0		
<p>comnts Fmd : SCA Riparian zone bog area around the small pond.</p>														
9	B 6	M 1	44	65	8	100	65 paper birch	immature	Y		10-19 years	0		
<p><u>Treatment Limiting Factors:</u> Too steep</p> <p>comnts Fmd : High quality, very healthy, almost pure white birch stand growing on the steep ridges and sink holes around a bog lake. Higher percentage of aspen and red maple in the northeast. Diameter decreases in the western portion of the stand. Very scenic. There is evidence the stand originated from wildfire.</p> <p>Wld : Oak seedlings common. Scattered red pine, white spruce, and white pine seedlings.</p>														
10	A 6	A 3	16	36	5	70	72 aspen (upland)	immature	N		10-19 years	0		
<p>comnts Fmd : Treated in 1972 using KG, the stand has just transitioned to a pole stand over aspen saplings.</p>														

* See "Compartment Packets Glossary of Terms" document link on web site for further descriptions and code definitions.

Stand	Cover Type-Size Dnsty	Under Story-Stkng Level	Acrs	Age	avg. D		Site Indx	Mgt Obj	Condition	Silv. Criteria Met?	Method Cut	Trtmt. Period	Harvest Priority	Cultural Need
					B H	Tot. BA								
11	A3	X0	41	7	1	0	75	aspen (upland)	immature	N		40-49 years	0	
comnts Fmd : Treated under permit # 011-00-01, the stand has regenerated well.														
Wld : Red oak sawtimber residual, becoming more numerous to the north.														
12	V0	V0	1				0	10	bog or muskeg	nonstocked	N		not scheduled	0
comnts Fmd : Small bog														
13	A3	X0	60	17	3	0	75	aspen (upland)	immature	N		30-39 years	0	
comnts Fmd : 2-4" diameter, 20-30' tall.														
14	A3	F1	50	4	1	0	62	aspen (upland)	immature	N		50-59 years	0	
comnts Fmd : Cut under permit # 012-00-01 by Minerick Logging in 2005. Aspen has regenerated nicely.														
15	A3	X0	29	6	1	0	60	aspen (upland)	immature	N		50-59 years	0	
comnts Fmd : Cut the summer of 2002 under permit # 013-00-01. The regeneration is 4-8' tall, but there are some sparse areas.														
Wld : Widely spaced red oak and white pine poles. Few red oak sawtimber trees to north.														
16	A3	F1	51	14	3	0	72	aspen (upland)	immature	N		30-39 years	0	
comnts Fmd : The aspen is doing very well with diameters averaging 2-4" with heights of 20-30'. Scattered fir in the understory.														
Wld : Sporadic white pine poles and saplings. Scattered red oak poles and sawtimber.														
17	M6	M1	94			10	90	72	northern hardwood	unevenaged	N		10-19 years	0
comnts Fmd : Cut under permit # 014-00-01														
Wld : Large oak in canopy. Aspen and white birch poles present.														
18	A6	A3	5	36	5	70	70	aspen (upland)	immature	N		10-19 years	0	
comnts Fmd : Poletimber aspen over aspen saplings.														
19	M6	M1	29			10	90	57	northern hardwood	unevenaged	N		10-19 years	0
comnts Fmd : Cut under permit # 014-00-01. Very hilly with deep sinkholes. Large rocks (some truck sized) throughout the stand.														
20	A3	G0	13	16	2	0	62	aspen (upland)	immature	N		30-39 years	0	
comnts Fmd : Cut under permit #29-91-01. Aspen is doing very well.														
21	A3	U0	95	28	4	0	72	aspen (upland)	immature	N		20-29 years	0	
comnts Fmd : CUT 1979 THRU 1982. 3-5" diameter 30-40' tall. Aspen saplings moving toward a pole stand.														
Wld : Scattered red oak poles and sawtimber. White pine and white oak poles present.														

* See "Compartment Packets Glossary of Terms" document link on web site for further descriptions and code definitions.

Stand	Cover Type-Dnsty	Under Story-Stkng Level	Acrs	Age	avg. D		Site Indx	Mgt Obj	Condition	Silv. Criteria Met?	Method Cut	Trtmt. Period	Harvest Priority	Cultural Need
					B	Tot. BA								
22	M6	F 2	6	10	90	52	northern hardwood	old growth (potential or actual)	N		10-19 years	0		
<p>comnts Fmd : SCA This stand is a mix of M4B4F4A4 over a fir understory of saplings and seedlings. Eastern portion of the stand will be retained as a riparian buffer along Crooked Lake.</p> <p>Wld : Special conservation area along Crooked Lake. Maintain as movement corridor for wildlife along lakeshore. Promote habitat elements such as supercanopy trees, numerous large snags, abundant and varied tree cavities/dens, frequent large diameter downed trees, and natural ecosystem processes/disturbances.</p>														
23	L 0	L 0	44			0	lowland brush	old growth (potential or actual)	N		not scheduled	0		
<p>comnts Fmd : SCA Tagalder and willow along Poplar Brook. Retain as riparian zone/wildlife travel corridor. Refer to wildlife comments.</p> <p>Wld : Special conservation area. Provides for consistent management of the Poplar creek corridor within this compartment. Maintain as movement corridor for mammals, amphibians, reptiles, and birds. Promote natural ecosystem processes/disturbances.</p>														
24	A 2	F 2	62	13	2	0	60 aspen (upland)	immature	N		30-39 years	0		
<p>comnts Fmd : Cut in 1995 under permit # 12-90-01. Aspen regeneration is patchy, with lots of conifer clumps. The conifers are primarily a mix of fir, spruce, and jack pine.</p> <p>Wld :</p>														
25	A 6	F 3	25	83	9	80	65 aspen (upland)	mature	Y	final harvest	within 0-9 years	2		
<p>comnts Fmd : A5F5B4M4 Stand is quite variable with a mix of aspen, fir, white spruce, white birch and red maple. Better stocking to the east. Stand also contains a few very large white spruce, white pine, and small cherry which will be retained for wildlife/diversity. The Bass Lake Motorcycle trail runs through the stand on the west.</p> <p>Wld : Retain some white birch, white spruce, and black spruce. Leave all white pine, hemock, cedar, and oak.</p>														
26	Q 6	Q 3	141	76	7	90	45 mixed swamp conifer	old growth (potential or actual)	N		not scheduled	0		
<p>comnts Fmd : SCA along Poplar Brook. Scattered white pine, white birch. Retain as riparian management zone. Refer to wildlife comments.</p> <p>Wld : Special conservation area. Provides for consistent management of the Poplar creek corridor. Maintain as movement corridor for mammals, amphibians, reptiles, and birds. Promote habitat elements such as supercanopy trees, numerous large snags, abundant and varied tree cavities/dens, frequent large diameter downed trees, and natural ecosystem processes/disturbances.</p>														
27	A 6	F 3	6	83	9	80	65 aspen (upland)	old growth (potential or actual)	Y		not scheduled	0		
<p><u>Treatment Limiting Factors:</u> Potential or designated old growth</p> <p>comnts Fmd : SCA Buffer strip along south edge of Crooked Lake. A5F5B4M4 Stand is quite variable with a mix of aspen, fir, white spruce, white birch and red maple. Retain as a riparian management zone. Refer to wildlife comments.</p> <p>Wld : Special conservation area. Promote habitat elements such as supercanopy trees, numerous large snags, abundant and varied tree cavities/dens, frequent large diameter downed trees, and natural ecosystem processes/disturbances.</p>														
28	A 3	F 2	129	6	1	10	62 aspen (upland)	immature	N		50-59 years	0		
<p>comnts Fmd : Cut under permit # 015-00-01. Stand is composed of young aspen and fir regeneration under scattered large white pine sawtimber. There are occasional pockets of fair white pine regeneration.</p>														
29	M 6	F 1	4	10	80	62	northern hardwood	unevenaged	N		10-19 years	0		
<p>comnts Fmd : Small 5 acre patch of lowland hardwoods, hemlock, cedar and yellow birch. Originally contained fir but most of it is dead and down. Section corner IP is located in the road.</p>														

* See "Compartment Packets Glossary of Terms" document link on web site for further descriptions and code definitions.

Stand	Cover Type-Dnsty	Under Story-Stkng Level	Acrs	Age	avg. D		Site Indx	Mgt Obj	Condition	Silv. Criteria Met?	Method Cut	Trtmt. Period	Harvest Priority	Cultural Need
					B	Tot. BA								
30	A2	X0	58	17	1	0	50	aspen (upland)	immature	N		40-49 years	0	
comnts Fmd : Good A3 regeneration on the high ground, but much of the stand is very wet with limited aspen regeneration and a fair amount of willow.														
31	M6	M1	21			10	100	57	northern hardwood	unevenaged	N		not scheduled	0
comnts Fmd : Very hilly with large boulders. Deep sinkholes. Fair amount of aspen can be found on the ridges. Slopes exceed 100% in several places. Stand is inoperable.														
32	V0	V0	1				0	10	bog or muskeg	nonstocked	N		not scheduled	0
comnts Fmd : Small bog														
33	R9	R2	65	70	14	120	60		red pine	immature	N		10-19 years	0
comnts Fmd : Cut under permit #016-00-01 by Lafleur. Getting some red and white pine regen where the soil was disturbed.														
34	A3	X0	80	17	1	0	55		aspen (upland)	immature	N		40-49 years	0
comnts Fmd : 1-3" aspen with scattered fir saplings. Pockets of sparse regeneration. Stems are short. Scattered small openings. Wld : Large white pine residual trees throughout stand.														
35	A4	A3	59	34	5	40	60		aspen (upland)	immature	N		20-29 years	0
comnts Fmd : Stand was cut in 1974 removing the aspen and leaving the large white and red pine. Aspen that regenerated is starting to move into the poletimber class. The "boot leg" of this stand is a W9 with large white spruce and remnant red pine sawtimber. The white pine regeneration gets better as you move north in the stand.														
36	A6	M3	6	69	12	90	46		aspen (upland)	mature	Y	final harvest	within 0-9 years	2
comnts Fmd : Aspen is large, overmature and dying out of the stand . Scattered white spruce and red maple. Heavy red maple understory. Some scattered white pine regeneration. Aspen and/or white pine are both acceptable species for regeneration. Long term M:O will probably be white pine. Retain all white and red pine, red oak. Wld : Leave all cedar, white pine, oak, and hemlock.														
37	A3	F1	35	21	3	0	55		aspen (upland)	immature	N		20-29 years	0
comnts Fmd : 2-4" saplings, 20-40' tall. A2 with upland brush on the north side of the stand.														
38	V0	V0	1				0	10	bog or muskeg	nonstocked	N		not scheduled	0
comnts Fmd : Small bog														
39	M6	M1	3			9	100	50	northern hardwood	unevenaged	N		10-19 years	0
comnts Fmd : Small hardwood stand of almost pure sugar maple. Did see 1 cherry, 1 white birch, 1 ironwood. Could lightly thin with stand 40.														
40	M6	M2	17			8	100	50	northern hardwood	immature	N	thinning	within 0-9 years	2 planting
comnts Fmd : Evenaged stand of decent quality hardwoods. Contains a higher percentage of large aspen and red oak sawtimber in the northern portion of the stand. DBH and basal area decrease moving north to south, and as a result, the sale will be concentrated to the northern portion of the stand.. Fairly hilly. The Bass Lake Motorcycle Trail runs through the north part of the stand. All red oak will be retained as will a few large aspen and any conifers. Wld : Underplant mesic conifers.														
41	Z0	Z0	1				0		water	nonstocked	N		not scheduled	0
comnts Fmd : Crooked Lake.														

* See "Compartment Packets Glossary of Terms" document link on web site for further descriptions and code definitions.
