comnts Fmd : B4A4M4, Cut with stand 16 this treatment period. 20 years ago when we did inventory, we decided to leave the stand uncut, for aesthetics along the Charlie Lakes Road, the white birch looked real nice. Now we should cut the stand, because a lot of the birch is dying, and looks bad. For residual after the cut, clumps of live white birch will be left, along with the black and white spruce, red and white pine. A buffer will be left around the V-type that is located within the birch stand. If the birch and aspen do not come back well after the harvest, then it will be planted with white pine seedlings.
