<p>Wld : Travis - 9/14/06 - 99% openland. Site is gently rolling with a rough, stoney surface. Scarce hawthorn trees and apple trees. Some fairly nice grass patches. Large expanses of goldenrod. Heavy M3 coming in a chain from hardwoods on all sides - 1' tall. Scattered cherry saplings and one clump of cherry poles. Nice raspberry fringe. 2' tall spruce and fir invading in SE lobe of field. Small vernal pond in far SE corner. Three man-made vernal ponds in SW portion of field - filled in with willow. These wetlands provide important amphibian habitat, bird niches, and deer watering points. There is an additional non-functional man-made push-out along two-track. Need to eradicate the maple intrusion with fire and/or mowing.</p>

<p>Wld : 80% openland. Level and fairly smooth. Good quality forage - 50% grass, 50% birdsfoot trefoil. Several scattered spruce poles with heavy cone crop. Aspen poles in small clone. Scattered sugar maple poles to south. 1 apple tree. Blackberry/raspberry pathces to south. 1' tall sugar maple saplings entering to south. Good field to maintain over time.</p>

<p>Wld : Travis 9/14/06 - Sharecropper field - Bartlett spreads fertilizer in spring that wildlife purchases, and ensures that grass is between 6" and 8" on Sept 1st so as to provide appealing forage to migrating waterfowl. Bartlett mows and bales hay. Gate leading to field is closed on Sept. 1st, and re-opened Nov 10th. each year. Opening is surrounded by private fields to the north, and a wetland complex to south. This field is managed as part of the AuTrain Waterfowl Project. No decking of trees allowed in field, and timing of adjacent timber harvests should be scheduled around sharecropping activities.</p>
