Treatment Limiting Factors: Influence zones Too steep														
comnts Fmd : 2006 LEAVE THIS STAND TO CONVERT TO WHAT IT WILL AS THE JACK PINE DIES.

comnts Fmd : 2006 THIS STAND OF BIG TOOTH ASPEN IS ON A SOUTHWEST SLOPE AND STANDS A GOOD CHANGE OF BEING HEAVILY BROWSED BY ELK. I'M NOT SURE WHAT THE RESULTING STAND MIGHT BE, I AM AFRAID U MIGHT BE THE RESULT.														
91	A 3	G 0	26	17	2	0	60	aspen (upland)	immature	N		40-49 years	0	
comnts Fmd : 2006 THIS STAND HAS BEEN BROWSED AND THERE ARE PATCHES OF A3 WITHIN THE U TYPE OF THIS STAND. THIS STAND COULD BE 40% TO 50% U TYPE--CHERRY BRUSH,SWEETFERN, WITCH HAZEL, KNAPWEED, AND ST. JOHN'S WART.														
92	A 6	A 2	10	78	8	100	60	aspen (upland)	mature	Y		40-49 years	0	
Treatment Limiting Factors: Retention of stand for regeneration purposes (ie. shelterwood)														
comnts Fmd : 2006 THIS STAND IS ON A FAIRLY STEEP WESTARD FACING SLOPE. I WOULD LIKE TO TO SEE THIS STAND CONVERT TO A PINE OAK STAND NATURALLY. THE DYING ASPEN WILL PROVIDE WILDLIFE HABITAT WHILE STANDING AND WOODY DEBRIS WHEN IT FALLS. THE HIGH COUNTRY PATHWAY IS THE EASTERN BORDER OF THE STAND.														
93	R 3	A 1	32	16	2	0	50	red pine	immature	N		50-59 years	0	
comnts Fmd : 1995 SCATTERED RESIDUAL OAK THROUGHOUT THE STAND. 2006 THE RED PINE IS ABOUT 12 TO 15 FEET TALL AND ABOUT 2 INCHES IN DIA.
