<p><u>Treatment Limiting Factors:</u> Delayed treatment for age/size class diversity</p> <p>comnts Fmd : Natural stocking of red pine in the understory, 6" diameter. Oak is not going to improve or deteriorate over the next 10 yrs, and thinning, or final harvest of the stand is not going to be practical. The oak is not high quality, (pins poor form) and the red pine that is there is too small for the most part to be sold as pulp. Recommend that the stand be allowed to develop red pine pulp to the market stage, and then treat next entry.</p>
