

	Level 4 Cover Type	Size Density	Acres	Stand Age	BA Range	General Comments:
2	4191 - Mixed Upland Deciduous with Conifer	High Density Pole	26.8	84		Ridge between Fen. Mixed stand which is a buffer for the Fen. Some mortality to paper birch and aspen. Leave
5	4116 - Mixed N. Hardwood - Aspen	High Density Pole	48.8	86		Mixed stand of maple and aspen. Small openings within the stand. Poor quality hardwood stand. Some mortality occurring.
6	4191 - Mixed Upland Deciduous with Conifer	High Density Pole	57.7	93		Very mixed stand next to Fen and low areas. Heavy to conifer with some mortality to birch and aspen. Small maple stand along the road.
7	6112 - Lowland Aspen	High Density Log	55.6	62		Along part of the Fen. Low ground mostly. Lots of mortality to Aspen and conifer.
8	4191 - Mixed Upland Deciduous with Conifer	Low Density Pole	42.6	65		Opening which has filled in. Has a mix of cherry and jack pine with some larger diameter trees.
11	4191 - Mixed Upland Deciduous with Conifer	Medium Density Pole	34.1	32		Small drainage runs through the stand. Willow is present along the drainage. Very mixed stand with open areas.
12	4311 - Pine, Aspen Mix	Medium Density Pole	30.3	47		Very diverse stand with pine and aspen clones. Some mortality to the aspen. Some open areas scattered across the stand.
13	4191 - Mixed Upland Deciduous with Conifer	Medium Density Pole	50.8	88		very mixed, stand is mostly upland and some low areas. There are a few small opening scattered in the stand. There is some mortality. to the aspen, spruce and fir. Few of the low areas have willow and tag alder.
14	42220 - Natural Jack Pine	High Density Pole	10.8	45		Part of Corn Cob Pine sale. There was approximately 1 to 2 acres cut with the sale which is regenerating to aspen and jack pine. The entire area within the sale boundary was not cut. Some open areas.
15	4112 - Maple, Beech, Cherry Association	High Density Log	146.4	94	111-140	The stand is ready to be select cut. There is some areas of nice maple and cherry. Areas of heavy BA.
16	42110 - Planted Red Pine	High Density Sapling	16.1	11		Nice plantation with some jack pine mixed in the red pine stand. A little cherry is present in the stand. Will need to be checked in the future for sawfly.
18	4139 - Aspen, Mixed Deciduous	High Density Sapling	81.5	14		Nice aspen regeneration of 10-20 feet tall with some white pine and other overstory trees were left along the bog edge. Few low areas within the stand.
19	42220 - Natural Jack Pine	High Density Pole	32.4	54		Mixed size classes of pine stand. Some mortality with jack pine of 12 plus inch trees. Some areas have more diversity of species in a few areas.
22	42110 - Planted Red Pine	High Density Sapling	30.2	15		Old opening which was planted. Some jack pine, aspen and cherry are mixed into the stand. Nice growth on the red pine. Check for sawfly damage.

	Level 4 Cover Type	Size Density	Acres	Stand Age	BA Range	General Comments:
23	4119 - Mixed Northern Hardwoods	Medium Density Pole	61.4	94		Stand on contract with Sled Drag Sale. The site is to be chipped and may be cut this summer. Very mixed stand and very open in few areas.
24	42110 - Planted Red Pine	High Density Sapling	24.0	15		Nice red pine plantation with some cherry, aspen and jack pine scattered in the stand. Red pine are 10 to 20 feet tall. Need to check for sawfly and spray if necessary.
25	4112 - Maple, Beech, Cherry Association	High Density Log	14.8	96	81-110	Nice stand with a little top snap in maples. Stand was cut in with adjacent stand in compartment 102 on Old Stump Hardwood in 1999. Not much for beech within the stand.
26	6117 - Lowland Deciduous, Mixed Coniferous	High Density Sapling	8.9	5		New stand added. Partly cut on Rejuvenated Dinosaur Sale. Part of stand is overmature aspen with mortality. Aspen and jack pine more on western portion of the stand.
27	42110 - Planted Red Pine	High Density Log	199.1	73	111-140	Most of the stand was thinned in 2004 on Rejuvenated Dinosaur Sale.
28	42110 - Planted Red Pine	High Density Sapling	27.5	11		Nice plantation with a few trees are flagging along the road. The stand was burned and replanted in 1998. There are a few cherry within the stand and some jack pine along edge.
29	42110 - Planted Red Pine	High Density Log	40.7	72	111-140	Thinned in 2004 on Rejuvenated Dinosaur Sale. Starting to get into the larger diameter.
30	4115 - Y.Birch, Hemlock NH	High Density Log	56.0	96	81-110	Stand was harvested in 2006 on Spring Relief Hardwood sale. Areas are heavier to hemlock with a small grove of hemlock in the middle of the stand. Small wet areas within the stand.
32	4191 - Mixed Upland Deciduous with Conifer	Low Density Pole	95.2	34		Stand swapped from Non-Forest to Forested. Under contract on Sled Drag Sale to be chipped. Portion of the stand is to be left uncut for wildlife to maintain some trees in the opening. Stand was originally an opening which has filled in with jack pine and cherry. Very mixed stand with species and densities. Few aspen clone areas within the stand. ORV parking lot is along the Goodereau Road. ORV trail runs throughout the stand. Stand is to be burned after harvest has taken place.
34	42221 - Natural Jack Pine, Mixed Deciduous	Low Density Pole	22.5	44		Under contract on Sled Drag Sale to be chipped. Very open stand with some nice aspen patches.
35	6122 - Black Spruce	High Density Pole	23.6	57		Thick black spruce stand with some tamarack and few white pine within the stand. Very wet in areas across most of the stand with spagnum moss and leatherleaf for ground cover.
36	6128 - Lowland Coniferous, Mixed Deciduous	High Density Log	14.7	127		Nice hemlock mixed stand with a variety of species. Some large diameter hemlock in the stand. Some hemlock regeneration of 3 to 25 feet.
37	42120 - Planted Jack Pine	Medium Density Pole	4.2	52		Been thinned before with some open areas with some cherry. The stand has a ridge running east and west on it.

	Level 4 Cover Type	Size Density	Acres	Stand Age	BA Range	General Comments:
38	42110 - Planted Red Pine	High Density Log	6.7	73	141-170	Stand was thinned 1994 with part of red pine stand to the north. Nice red pine stand with very little understory. Is ready for harvest of some type.
39	42120 - Planted Jack Pine	High Density Pole	4.3	52		Stand is open mostly on the northern side with cherry. Dry site with moss. Mortality to some of the jack pine.
40	4311 - Pine, Aspen Mix	Medium Density Pole	34.5	66		Very mixed stand with patches of various species. One patch of white pine on a ridge on south west side of the stand. Part of Sled Drag Sale which is to be chipped.
42	6117 - Lowland Deciduous, Mixed Coniferous	High Density Pole	51.1	23		Very mixed stand with lots of diameter classes and species. Stand was cut on 2 different timber sales which were completed in 1986. Was a choppers choice sale with some overstory was left on the site. Stand is a mix of upland and lowland. There are tag alder areas and small drainage runs thru the stand.
43	4112 - Maple, Beech, Cherry Association	High Density Log	171.1	90	81-110	Was select harvested on Spring Relief and East Boundary Hardwood sales in 2005 and 2006. Mortality to some of the beech and maple. Beech snap occurring within the stand. There is some dieback to the maple within the stand. Lots of beech regeneration and some maple and found some of the planted white pine from a few years ago. Scattered WP & Hemlock within the stand. There is more beech mortality to the north and south side of the stand. There maybe some resistant beech trees.
44	4191 - Mixed Upland Deciduous with Conifer	Low Density Pole	27.7	47		Stand swapped from Non-Forest to Forested. Filling in opening with some red maple trees scattered in the stand. Trees are very clumpy. There are some larger openings within the stand. Portion of the stand is under contract for Sled Drag Sale to be chipped.
45	4139 - Aspen, Mixed Deciduous	High Density Sapling	12.9	8		Chipped on East Boundary Opening Hardwood sale in 2001. Some good aspen and cherry regeneration of 5 to 10' tall.. Some beaked hazel and a few open areas with very few trees.
46	4191 - Mixed Upland Deciduous with Conifer	Low Density Sapling	45.9	8		Stand swapped from Non-Forest to Forested. Was chipped previously with areas of heavier cherry regeneration. Areas of white pine logs and red maple left from the cutting. Some good open areas but limited.
48	4119 - Mixed Northern Hardwoods	Medium Density Pole	15.3	83		Old opening which has filled in with mackinac mix. Very mixed stand with drainage to the north.
