22	J6	S3	35	78	8	80	55	jack pine	old growth (potential or actual)	Y	final harvest	within 0-9 years	1	natural regeneration
comnts Fmd : SCA-Deeryard. Mixture of jack pine and black spruce. Acceptable alternative management objectives include any species mixture currently found onsite. Survey work will be needed. Retention: The northwest edge can be excluded with the stand boundary. It has lower site quality and the trees are stunted. Leave a few red pine and white pine. Wld : Leave a few pine, particularly some large white pine. Retention should be left on the southeastern corner of the stand to maintain the corridor along the river.														
23	Z0	Z0	13		0	0		water	nonstocked	N		not scheduled	0	
comnts Fmd : Manistique River														
24	J5	J3	186	33	5	40	50	jack pine	immature	N		20-29 years	0	
comnts Fmd : The DNR holds a public easement traveling through the private land east of this stand. Landowner has been told that the gate on the road needs to remain open at all times.
