(Grieve) THIN STAND EVERY THIRD ROW. Thinning completed in 1999 Yellow Cap Red Pine (Contract # 111-97-01). Removed every third row. Planting was very closely spaced therefore some extra trees were removed from some rows to facilitate logging equipment. Row spacing will be a concern with future harvests in this stand. Cutting took place in spring. An error was discovered in the calculations for the volume of the sale. Data was entered as a 10 factor cruise when in fact the cruise was done with a 20 factor. Thus a 100% over-run was realized by the producer.

comnts Fmd : 2/8/2005 This stand is a mix of age & species. Hold for ten years or 20 if possible. This is for visual reasons! I would like to see the back side of this 80 be 20 years old before the stand is cut. It would be best if we cut this stand first before we cut the back stand.
