Stand	Cover Type-Dnsty	Under Story-Stkng Level	Acrs	Age	avg.		Site Indx	Mgt Obj	Condition	Silv. Criteria Met?	Method Cut	Trtmt. Period	Harvest Priority	Cultural Need
					D B H	Tot. BA								
1	X0	X0	5			0		other non-stocked or non-forest or non-productive	nonstocked	N		not scheduled	0	
comnts Fmd : Sour Gas Sweetening Plant owned by KCS. Essentially no ground cover on the site. Plant is fenced and gated. Former owners include Amoco, Savoy and Hawkins Oil. Three pipelines lead to or from this facility.														
2	X0	X0	3			0		other non-stocked or non-forest or non-productive	nonstocked	N		not scheduled	0	
comnts Fmd : Sour Gas Sweetening related site with valves from pipelines. Clearing has some vegetation on the ground but no timber.														
3	U4	U0	10	39	6	10	50	upland brush	sparse	N		10-19 years	0	
4	L0	L0	8			0		lowland brush	nonstocked	N		not scheduled	0	
comnts Fmd : Pothole like setting with stand down over a steep bank. Stand consists of an island of Lowland brush surrounded by marsh grasses and a few cattails.														
5	R6	M1	14	29	7	80	50	red pine	immature	N		10-19 years	0	
comnts Fmd : Planted in 1982 - Plantation has gaps in it. Red Pine is just reaching polesize.														
7	U4	U0	30	34	5	10	51	upland brush	sparse	N		not scheduled	0	
comnts Fmd : This area contains a mixture of grass openings and sparse timberlands. Lots of cherry in places. Ground cover includes blackberry, grass and bracken fern.														
9	V0	V0	4			0		bog or muskeg	nonstocked	N		not scheduled	0	
comnts Fmd : Large leatherleaf bog. Wet site - no timber on site.														
10	M6	M1	10		9	110	65	northern hardwood	unevenaged	N	selection	within 0-9 years	1	
11	Q3	L0	23	34		0	30	mixed swamp conifer	immature	N		50-59 years	0	
comnts Fmd : Tamarack, spruce and cedar occupy this site. Very wet soil, some tag alder. No merchantable timber yet. No site index taken - estimated.														
12	V0	V0	4			0		bog or muskeg	nonstocked	N		not scheduled	0	
comnts Fmd : No trees - leatherleafbog with pockets that hold water most years. No cattails, just leatherleaf and some marsh grasses. Bog lies in a pronounced depression that is 10-12' lower than the surrounding stands.														
14	R6	M1	47	29	7	90	50	red pine	immature	N		10-19 years	0	
comnts Fmd : Planted in 1982 - Plantation has gaps in it. There is considerable competition from cherry that is mixed into the stand. Open areas have lots of bracken fern ground cover. Red Pine is just reaching polesize. (R5M4R2) Red Pine has lots of limbs. The snowmobile trail bisects the stand. 2009 comments - check stand 10 years, still a bit low on ba to thin - with heavy hdwd and aspen competition in some areas it may be better to thin heavy and remove all hdwd/aspen and let convert. Just an option to think of. Dkj														
15	A3	M1	43	17	3	0	56	aspen (upland)	immature	N		30-39 years	0	
comnts Fmd : Stand was clearcut in 1991-92. 49 acres with 175 cords of Red Maple and 340 cords of Aspen.

Stand	Cover Type-Dnsty	Under Story-Stkng Level	Acrs	Age	avg. D		Site Indx	Mgt Obj	Condition	Silv. Criteria Met?	Method Cut	Trtmt. Period	Harvest Priority	Cultural Need
					B	H								
16	A3	M1	6	27	2	0	75	aspen (upland)	immature	N		30-39 years	0	
comnts Fmd : Some stems just reaching polesize; Some hardwood species mixed in mostly in the understory. Snowmobile Trail/Seasonal County Road along West edge of the stand.														
18	M6	M1	112		9	70	65	northern hardwood	unevenaged	N		10-19 years	0	
comnts Fmd : Many parts of the stand have a good supply of advanced regeneration. Part of this stand was marked for thinning before. Paint is still visible in the woods. NOTE FROM 12/2/99: Do not remove Big Tooth Aspen during thinning, leave it standing. 2004 KGR Note: This stand was a part of a 143 acre hardwood thinning completed 12/16/03 under contract #025-01-1. Stand 18 encompassed 103 acres of the sale. Residual BA was not tracked during cruise, so this figure is estimated to be +/-70 sq ft.. 2009 comments: south part of sale has heavy beech regen , north part a good mix of northern hdwd regen. Dkj														
19	M6	M3	37		10	80	70	northern hardwood	unevenaged	N		10-19 years	0	
comnts Fmd : FDF. 2004 KGR Note: Hardwood Thinning was completed here in 12/16/03 as part of a 143 acre timber sale. Sale # 025-01-1 included this 38 acre stand. Residual BA was not noted in the cruise, so it is estimated to be 70 sq ft.. 2009 comments Part of big slam hdwd sale # 25-01 completed 2004, east 1/4 of stand heavy beech regen remainder good mix of N.H. regen. Dkj														
20	M5	M1	10		9	60	62	northern hardwood	unevenaged	N		20-29 years	0	
comnts Fmd : Stand on west aspect slope														
21	M6	M3	63		9	130	60	northern hardwood	unevenaged	Y	selection	within 0-9 years	1	
comnts Fmd : Terrain varies from level to rolling. ORV trail bisects the stand. Higher Cherry BA in the eastern part of stand														
22	M6	M1	90		8	80	62	northern hardwood	unevenaged	N		10-19 years	0	
comnts Fmd : .Bear Beech Hdwd # 48-03 completed in 2005														
23	U4	U0	51		8	10	51	upland brush	nonstocked	N		not scheduled	0	
comnts Fmd : Lots of grasses, bracken fern, some blackberry. Timber is mostly cherry in the form of saplings, poles and a few low quality sawlogs. Minor occurrence of aspen. Lots of open spaces. ORV trail passes through the southern edge of this stand. Also scattered white pine and juneberry														
25	M8	W1	29	60	12	70	52	northern hardwood	immature	N		10-19 years	0	
comnts Fmd : Scattered aspen in north part of stand. Possible final harvest in 10 years - hardwood quality very questionable. Small pocket of W9 along bog - too small acreage to make it a stand. This should be left, not included in any harvests. Dkj														
27	U4	U1	5		7	10	50	upland brush	sparse	N		20-29 years	0	
comnts Fmd : Scattered cherry and maple														
28	U4	U1	22		8	10	51	upland brush	sparse	N		not scheduled	0	
comnts Fmd : ORV Trail passes through the northern edge of this stand. Scattered cherry with small aspen clone in SE part of stand														
29	M5	M2	12	40	7	50	50	northern hardwood	low quality	N		20-29 years	0	
comnts Fmd : ORV Trail touches the northern tip of this stand.														
31	M9	M2	119		10	80	57	northern hardwood	unevenaged	N		10-19 years	0	
comnts Fmd : ORV trail bisects the stand. Good mixture of sawlog/pole/saplings. Terrain is rolling. Stand thinned in Spring 2003 (Sale #013-01-1 Deadman's Lake)

Stand	Cover Type-Dnsty	Under Story-Stkng Level	Acrs	Age	avg. D		Site Indx	Mgt Obj	Condition	Silv. Criteria Met?	Method Cut	Trtmt. Period	Harvest Priority	Cultural Need
					B	Tot. BA								
32	M 6	M 1	132	9	70	66	northern hardwood	unevenaged	N			10-19 years	0	
comnts Fmd : FDF A TSI was done on 120 acres here in 1979. That exposed a lot of crop trees and immensely improved the stand. The BA is somewhat lower at the south end of the stand. 2004 KGR Notes: Timber sale completed 11/25/03 by AJD Forest Products. Thinning of hardwood under contract 035-01-01. This 128 acre stand was marked by Ken Rouston. Lots of nice hard maple crop trees on the site now after the harvest. Cruise indicated +/- 67 sq ft of residual timber. Hard Maple dominates stand but there is some Beech, Black Cherry, Red Maple, Basswood and Yellow Birch in the stand. 2009 comments: Regen starting to appear , good mix of sugar maple black cherry and some beech. Dkj														
33	R 5	M 1	36	29	7	70	50	red pine	immature	N		10-19 years	0	
comnts Fmd : Scattered aspen and red maple mixed into plantation.														
35	M 6	M 1	250	9	90	66	northern hardwood	unevenaged	N			10-19 years	0	
comnts Fmd : Overworked hdwd sale. 43-01 completed 9/04. Good mixed generation dkj														
36	V 0	V 0	3					bog or muskeg	nonstocked	N		not scheduled	0	
comnts Fmd : Leatherleaf Bog in center with water around the leatherleaf, then marsh grasses along the edges. Still has water despite the dry summer. The stand is down in a depression some 15-20' lower than the surrounding stands.														
37	V 0	V 0	1					bog or muskeg	nonstocked	N		not scheduled	0	
comnts Fmd : Center is leatherlea, then a small wet area that holds water, then marsh grasses along the edge. Not as good of a water holding capacity as the bog 500' to the south. Sour gas pipeline directly south of the stand.														
38	M 6	M 2	77	9	90	58	northern hardwood	unevenaged	N			10-19 years	0	
comnts Fmd : variable stand with scattered aspen and multiple stemmed trees throughout - be a bit to low at this time for and treatment . Hold 10 years and then prescribe thinning. Some areas may respond better to selterwood cut - probably the north half of stand. Dkj														
39	U 4	U 0	4	6	10	52	upland brush	sparse	N			not scheduled	0	
comnts Fmd : This area contains a mixture of grass openings and sparse timberlands. Lots of cherry in places. Ground cover includes blackberry, grass and bracken fern. The stand is directly between two pothole bogs. ORV trail bisects the stand.														
41	A 5	M 1	2	34	6	50	55	aspen (upland)	immature	N		10-19 years	0	
comnts Fmd : Small aspen clone along edge of Upland brush type.. Can either treat with hardwood stand in 10 years and convert or final harvest and expand. Dkj 2009														
400	G 0	G 0	14					grass	nonstocked	N		within 0-9 years	0	other - specify in remarks
comnts Fmd : Grass opening, part of an old homestead. Wld : Leave as is. Re-establish northern berm.														
401	G 0	G 0	2					grass	nonstocked	N		not scheduled	0	
comnts Fmd : Grass opening resulting from once being part of an old farmstead.														
402	G 0	G 0	4					grass	nonstocked	N		not scheduled	0	
comnts Fmd : Grass opening resulting from once being a well site. Currently a detoxification permit is issued on the site and monitoring wells are scattered across the stand.														
403	G 0	G 0	3					grass	nonstocked	N		20-29 years	0	
comnts Fmd : Grass opening that was used for gas/oil purposes. Site is revegetated with knappweed and some grasses. Two bluebird boxes are located on the East side of the stand.
