

## West Branch Two Hearted River Cr418 Bridge

---

### ***Fish Species***

Brook Trout; Steelhead

### ***Species Description***

Brook trout are most frequently fished on this stretch of the Two Hearted River. Yearling steelhead are stocked into the Two Hearted River annually at the Reed and Green bridge which is downstream of this site. Steelhead run in the fall and spring seasons. Coho salmon runs are also good during the fall season.

### ***Geographic Coordinates***

Lat:46.591066 / Long:-85.629454

### ***Noteworthy***

From this bridge crossing, anglers can access both the north and west branches of the Two Hearted River. The north branch can easily be waded while the west branch has deeper holes so anglers should use care. The West Branch could be floated with a kayak, but overhanging tag alders may inhibit ease of navigation. Most anglers will use spinners to fish either of these streams. Riffles are limited in these reaches and most anglers will hit the deeper holes. Fly fishing at this site is not advised for either stream.

### ***Fishing Regulations***

The West Branch of the Two Hearted River is a designated Type 1 trout stream. Refer to the Inland Trout and Salmon Stream Regulations in the current Michigan Fishing Guide.

### ***Directions to Site***

This site is located north of the village of Newberry. Head north on M-123 to Four Mile Corner (County Road 407) and turn left. Follow County Road (CR) 407 for 17 miles to CR 416 and turn left (west). Continue for half mile to CR 418 and turn left (south). There will be a few sharp turns but stay on CR 418 for two miles until you hit the North Branch Two Hearted bridge crossing. Park at the top of the hill alongside the road. Private property is on both sides of the river so access the river directly from the road.
