

Youngs Lake

Fish Species

Brook Trout

Species Description

Brook trout spring fingerlings are stocked annually and when available, retired hatchery broodstock brook trout adults are also stocked. Brook trout growth is above average allowing fish to reach sizes upwards of 15 to 18 inches but most fish will be 7 to 10 inches in length.

Geographic Coordinates

Lat:46.443439 / Long:-85.717193

Noteworthy

With the trout season opening on the last Saturday in April each year, Youngs Lake is one to put on the destination list. At seven acres, this small trout lake offers a tranquil setting not too far from other trout fishing lakes in the area. Brook trout are typically caught here in the early and late part of the season. The hot weather during July and August make the fish hang out in deeper, colder water making this lake a bit of a challenge. Access here is perfect for a hand-carry watercraft. Before the season ends on September 30, Youngs Lake offers a terrific opportunity to capture photos of the fall colors.

Fishing Regulations

Youngs Lake is a designated Type A trout lake. Please refer to the Inland Trout and Salmon Lake Regulations in the current Michigan Fishing Guide.

Directions to Site

This site is North of the village of Newberry. Drive north on M-123 four miles to 4 Mile Corner (County Road 407) and turn left. Follow County Road (CR) 407 for about 4.5 miles to CR 455 and turn left. Follow CR 455 for about 5.7 miles to CR 422 and turn left. Follow CR 422 for about .8 miles past the Peanut Lake access site and look for a two-track on the left (east) side. Take the two-track until you get to the lake access site, parking is very limited.
