

Compartment Review Presentation

Baraga Forest Management Unit

Compartment 11070

Entry Year: 2027

Acreage: 2,147

County: Ontonagon

Management Area: Houghton Hardwoods

Stand Examiner: Ryan Mattila

Legal Description:

T51N, R39W, Sections 30, 31

T51N, R40W, Sections 24, 5, 26

Identified Planning Goals:

Manage to increase in stand diversity.

Soil and topography:

The compartment is level with deep cuts where the streams and feeders are. Silts are: Watton – Iron River – Baraga association (clay loams), and AuTrain – Rubicon association (sand)

Ownership Patterns, Development, and Land Use in and Around the Compartment:

Most of the surrounding land is managed for timber, except some land on the east side of the compartment that is used for hunting camps.

Unique Natural Features:

Wood turtle, Bald Eagle, Showy orchis, Male fern, fairy bells, Ram's head lady's-slipper, Canadian milk-vetch, and small-eyed mary have been documented in the compartment. Potential for osprey, wood turtle, bald eagle, great blue heron rookery, red-shouldered hawk, goshawk, moose, and gray wolf.

Archeological, Historical, and Cultural Features:

None.

Special Management Designations or Considerations:

None.

Watershed and Fisheries Considerations:

This compartment contains Mill Creek, East Branch Mill Creek, and a couple of unnamed tributaries. No specific comments other than follow BMP's

Wildlife Habitat Considerations:

Use buffers along streams to maintain these wildlife travel corridors.

Mineral Resource and Development Concerns and/or Restrictions

Surface sediments consist of lacustrine (lake) clay and silt. The glacial drift thickness varies from 10 to 50 feet. The Precambrian Freda Sandstone subcrops below the glacial drift. The Freda does not have a current economic use. Abandoned copper mines are located ten miles to the east. This area has not been leased for metallic exploration. Gravel pits are not likely to be found in this area. There is no economic oil and gas production in the UP.

Vehicle Access:

Access is through the USFS road system. There are internal logging roads, but overall access is fair.

Survey Needs:

None.

Recreational Facilities and Opportunities:

There are no recreational facilities in this compartment, and there do not appear to be any opportunities to develop any.

Fire Protection:

This is not a fire prone area.

Additional Compartment Information:

The following reports from the Inventory are attached:

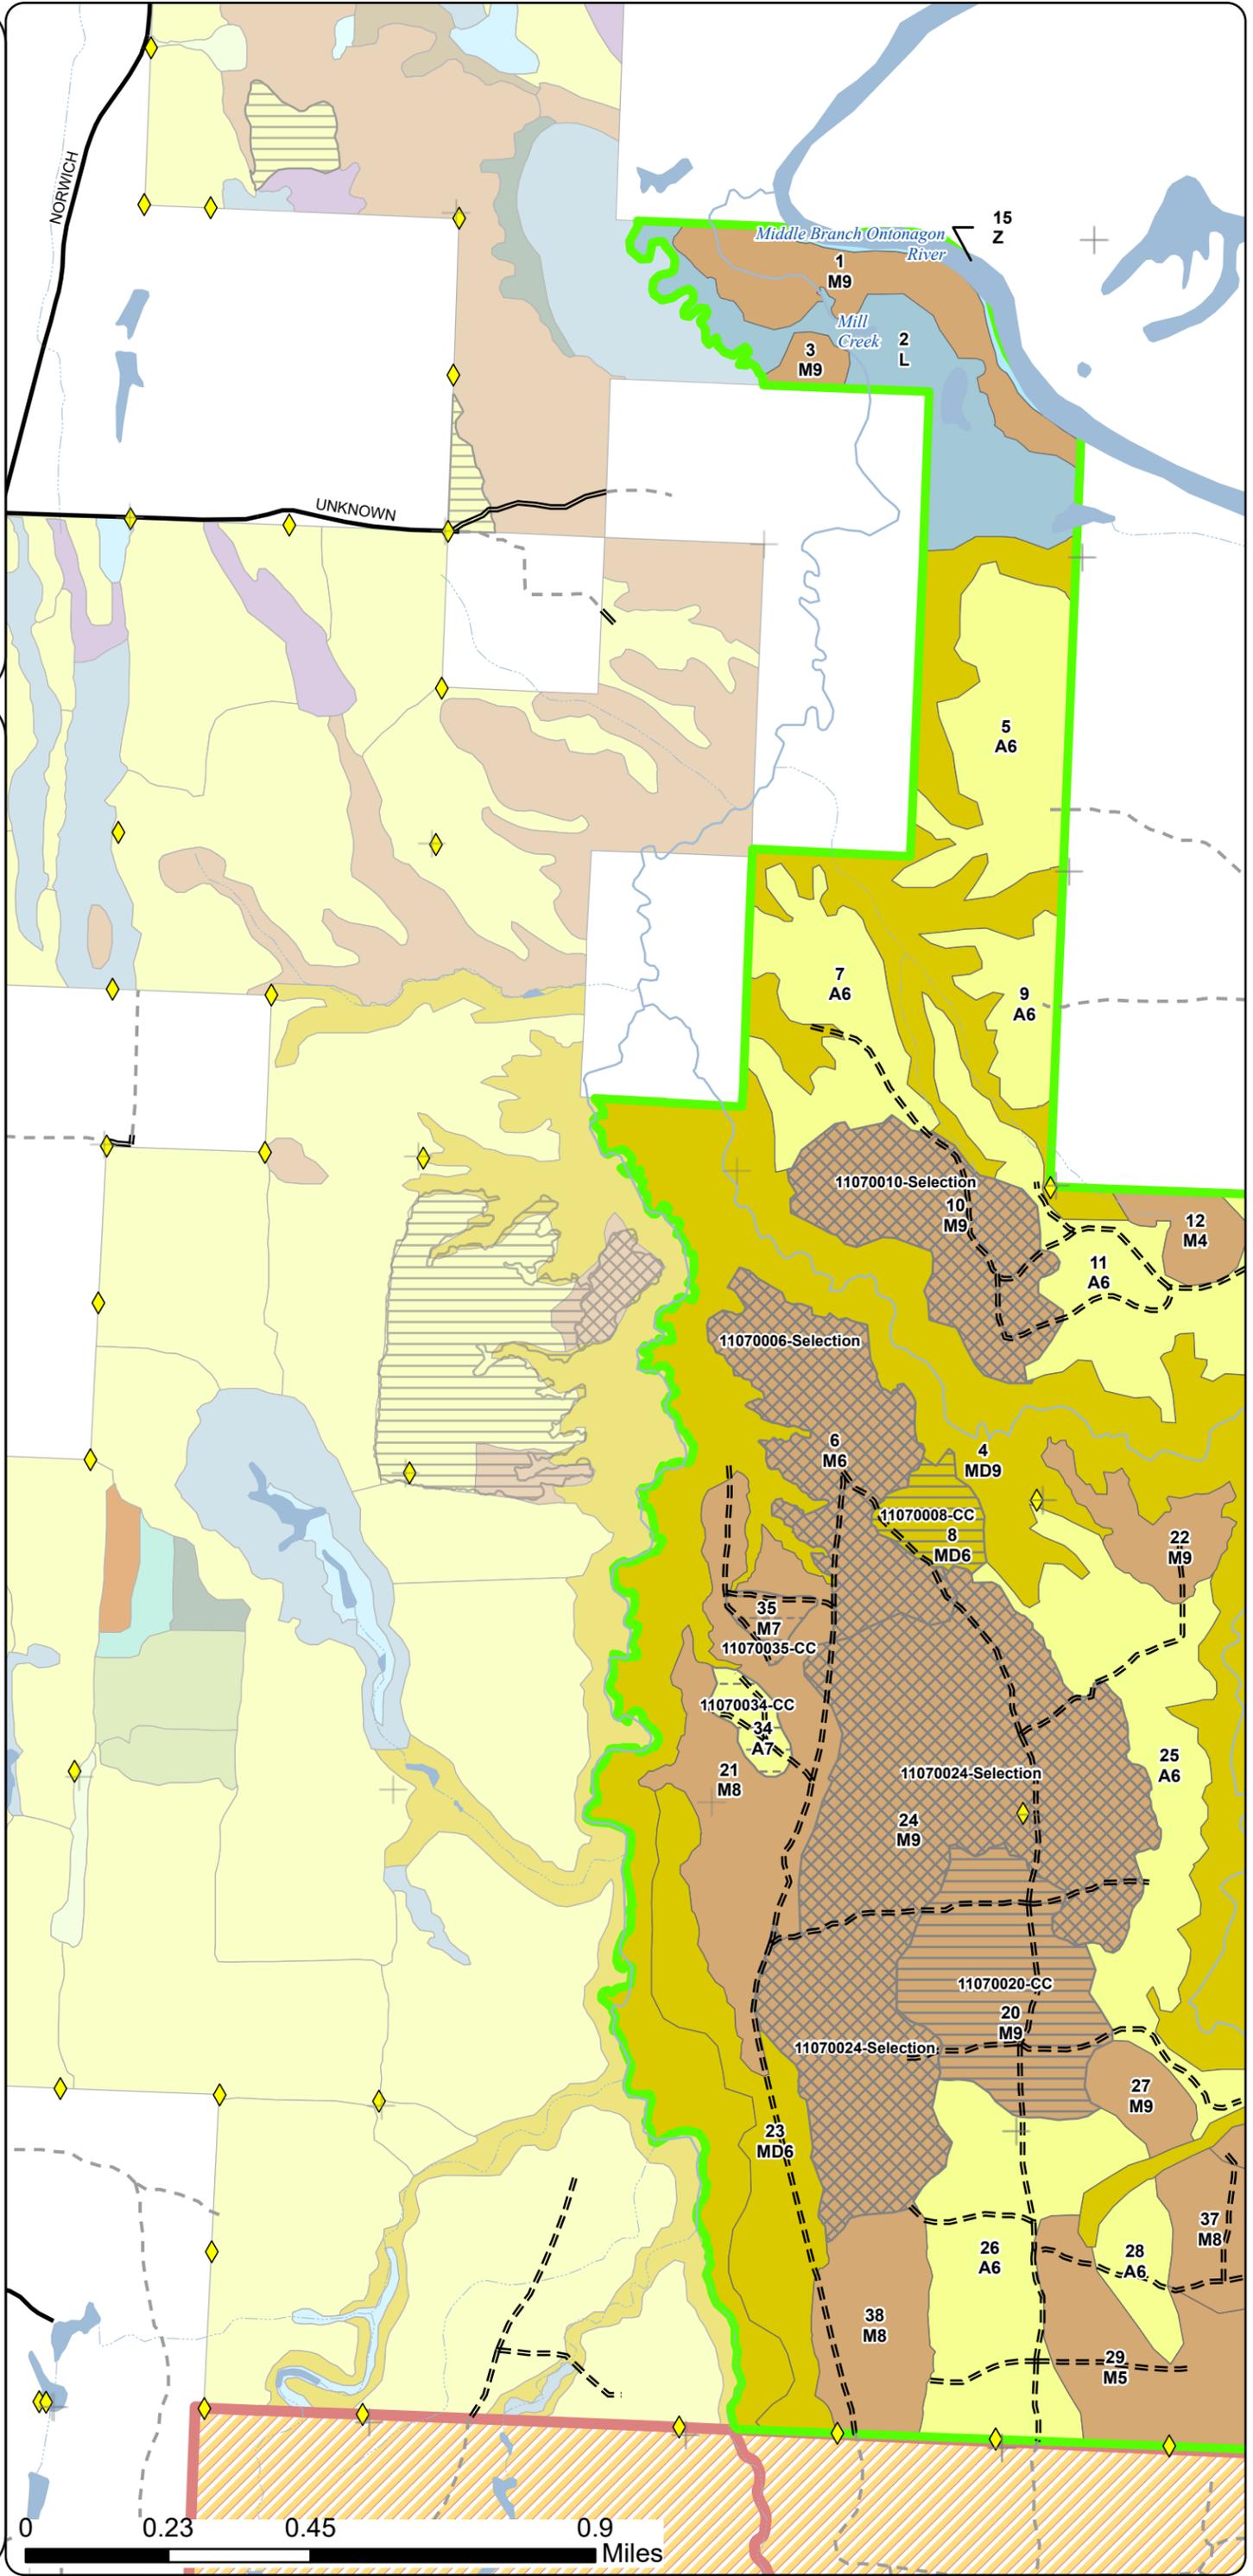

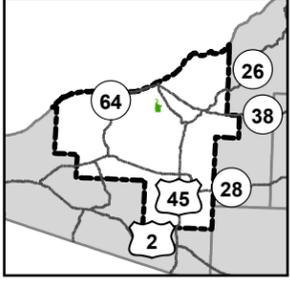

- Total Acres by Cover Type and Age Class**
- Cover Type by Harvest Method**
- Proposed Treatments – No Limiting Factors**
- Proposed Treatments – With Limiting Factors**
- Stand Details (Forested and Nonforested)**
- Dedicated and Proposed Special Conservation Areas**
- Site Condition Details**

The following information is displayed, where pertinent, on the attached compartment maps:

- Base feature information, stand boundaries, cover types, and numbers**
- Proposed treatments**
- Site condition boundaries**
- Details on the road access system**

Proposed Treatments:

35	11070035-CC	5.9	4112 - Maple, Beech, Cherry Association	7	73	51-80	Harvest	Overstory Removal	4199 - Other Mixed Upland Deciduous	Current	No
<p><u>Prescription</u> Harvest all trees 4.6" DBH and larger except all conifer species, red oak and elm. <u>Specs:</u></p> <p><u>Next Step</u> <u>Treatments:</u></p> <p><u>Acceptable</u> <u>Regen:</u></p> <p><u>Other</u> <u>Comment:</u></p> <p><u>Site Condition:</u> Proposed Start Date: 10/01/2026</p>											
34	11070034-CC	8.0	4130 - Aspen	7	55	1-50	Harvest	Overstory Removal	4199 - Other Mixed Upland Deciduous	Planting Record	No
<p><u>Prescription</u> Remove the overstory from advance regeneration, additional aspen regen should result from the aspen harvested that is present in the overstory <u>Specs:</u></p> <p><u>Next Step</u> <u>Treatments:</u></p> <p><u>Acceptable</u> <u>Regen:</u></p> <p><u>Other</u> <u>Comment:</u></p> <p><u>Site Condition:</u> Proposed Start Date: 10/01/2026</p>											
24	11070024-Selection	201.8	4119 - Mixed Northern Hardwoods	9	69	111-140	Harvest	Selection	411 - Northern Hardwood	Current	No
<p><u>Prescription</u> Selectively thin hardwoods to 70-90 square feet of basal area. Target large diameter trees for removal first to lower overall stand diameter, retaining one legacy tree per acre. Favor red oak, hemlock, white pine and cedar, where present. Red oak and black cherry should be released on 3 sides to an average basal area of 60 sqft. Where 30 sqft or more of hemlock occurs thin to no less than 100 sqft of basal area. Around areas of heavy hemlock open up the drip edge to encourage hemlock seedling establishment. Follow all guidelines set forth in "The Complete Marker". <u>Specs:</u></p> <p><u>Next Step</u> <u>Treatments:</u></p> <p><u>Acceptable</u> Any combination of the original stand's over story species prior to harvest. <u>Regen:</u></p> <p><u>Other</u> <u>Comment:</u></p> <p><u>Site Condition:</u> Proposed Start Date: 10/01/2026</p>

35 4112 - Maple, Beech, Cherry Association Sawtimber Well 5.9 73 51-80 N/A 2025 - The road work in this area has created issues with water drainage, manage this area as a large regen gap in the surrounding hardwood stand allowing the regen to grow up with the current surface water drainage issues. The road in the North west corner of the stand has washed out and this may resolve some of the issues. Care will need to be taken to not disturb the drainage patterns in the future. Harvested as Skeleton Hdwd first round, Winter 2018Hdwd and aspen regeneration 1969
