

Compartment Review Presentation

Atlanta Forest Management Unit

Compartment 54120

Entry Year 2017

Acreage: 1,658

County Presque Isle

Management Area: Cheboygan Basin Moraines

Revision Date: 2015-06-18

Stand Examiner: Richard Barber

Legal Description:

T33N, R2E, Sec. 13, 14, & 15.

Identified Planning Goals:

Protection of karst resource.

Soil and topography:

Section 15 features Shoepac Lake, wetlands north of Co. Rd. 634, and some higher, sandy soils. Sections 13 and 14 consist of flat, sandy soils which are well to excessively well drained. A fault line runs east-west through the compartment.

Ownership Patterns, Development, and Land Use in and Around the Compartment:

Adjacent land is mostly other state land, plus some hunting camps and cottages.

Unique Natural Features:

Part of extensive line of karst formations runs through the south and central portions of this compartment. Multiple ERA's are present.

Archeological, Historical, and Cultural Features:

None Reported.

Special Management Designations or Considerations:

Those portions of this compartment which are bounded by Elk Road, Tomahawk Lake Hwy, Shoepac Lake Road, and Co. Rd. 634 are closed to motorized vehicles by Director's Order.

Watershed and Fisheries Considerations:

No special considerations exist for this compartment.

Wildlife Habitat Considerations:

The primary focus of wildlife habitat management will be to address the habitat requirements identified for the listed featured species found in this compartment. These species include ruffed grouse, black bear, and white-tailed deer. Based on the selected featured species, some of the most significant wildlife management issues in the management area are the maintenance of young forest, the retention of large, over-mature trees and snags and the maintenance and expansion of hard mast and mesic conifer components.

Mineral Resource and Development Concerns and/or Restrictions

.Surface sediments consist of coarse-textured glacial till. The glacial drift thickness varies between 50 and 200 feet. Beneath the glacial drift is the Devonian Traverse Group. The Traverse is quarried for clay/shale and limestone/cement products near Alpena. There are no known gravel pits within two miles of the compartment, but potential appears to be good. This area has had some drilling for Silurian Niagaran Reefs, with production occurring to the north and west. Additional drilling is possible. The Antrim Shale is not present here. Nearly all State mineral rights in the township are currently under lease for oil and gas development.

Vehicle Access:

A director's order has already closed those parts of Compartments 120 and 123 (directly to the south) which fall within the borders of County Road 634, Shoepac Lake Road, Tomahawk Lake Highway, and Elk Road. Enforcement has been difficult, as ORVs enter the area from Shoepac Lake Road, Elk Road, or the ORV Route in Compartment 123.

Survey Needs:

Survey's may be required for timber sale prep.

Recreational Facilities and Opportunities:

The Shoepac Lake Access, Shoepac Lake Forest Campground(just south in Compartment 123), the Sinkholes Pathway, and the High Country Pathway are all popular attractions.

Fire Protection:

This compartment is located in the protection area of the Onaway DNR and the Onaway Fire Department located in Onaway. Fire starts have been from campfires and ORV's. Access is good with many county and 40 roads.

Additional Compartment Information:

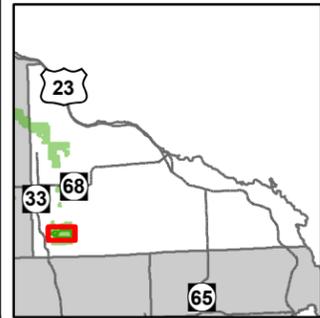

The following reports from the Inventory are attached:

- Total Acres by Cover Type and Age Class**
- Cover Type by Harvest Method**
- Proposed Treatments – No Limiting Factors**
- Proposed Treatments – With Limiting Factors**
- Stand Details (Forested and Nonforested)**
- Dedicated and Proposed Special Conservation Areas**
- Site Condition Details**

The following information is displayed, where pertinent, on the attached compartment maps:

- Base feature information, stand boundaries, cover types, and numbers**
- Proposed treatments**
- Site condition boundaries**
- Details on the road access system**

Report 6 – PROPOSED SPECIAL CONSERVATION AREA* (SCA) DETAILS

* This is a partial list of SCAs for this compartment. Not included are those areas identified under other Department initiatives (Natural Rivers, Deer Wintering Areas, etc.). Those will be identified in separate, future map and report products.

SCA Name	SCA Category	Detail Type	Recommendation	Acres
----------	--------------	-------------	----------------	-------

Comments

Report 7 – EXISTING SPECIAL CONSERVATION AREA DETAILS

* This is a list of SCA's for this compartment along with a 1/4 mile buffer surrounding the compartment. Refer to the Special Conservation Area Map for locations of the below listed Conservation Areas.

ERA = Ecological Reference Area
 HCVA = High Conservation Value Area
 SCA = Special Conservation Area

Conservation Area	Type	Description
ERA	Ecological Reference Areas	Ecological Reference Areas (ERAs) are high quality examples of natural communities that have been identified as Element Occurrences (EOs) by the Michigan Natural Features Inventory (MNFI) within the context of their natural community classification system. Element Occurrences with viability ranks of A (Excellent) or B (Good) and a Global (G) or State (S) element (rarity) ranking of endangered (1), threatened (2), or rare (3) serve as an initial base of ERAs. They may be located upon any ownership in the State. The system is comprised of individual or associations of natural community types that are managed for restoration and maintenance of natural ecological processes and values. The public may submit recommendations for lands as ERAs using the DNR Conservation Area Recommendation Form.

Report 8 – Forested Stands

Compartment: 120
Year of Entry: 2017

Level 4 Cover Type	Size Density	Acres	Stand Age	BA Range	General Comments:
6122 - Black Spruce	Sapling Well	51.2	71	Unspecified	treed bog
42200 - Natural White Pine	Sawtimber Well	9.9	76	51-80	
6122 - Black Spruce	Sapling Medium	3.0	71	Unspecified	Treed bog. Very similar to stand 1.
4121 - Oak, Aspen	Sawtimber Well	15.0	80	51-80	High Country Pathway.
4116 - Mixed N. Hardwood - Aspen	Sawtimber Well	2.9	77	Unspecified	
42210 - Natural Red Pine	Sawtimber Well	3.8	71	51-80	Natural stand in shallow depression with better site quality.
6112 - Lowland Aspen	Sawtimber Well	6.4	41	Unspecified	Ice sheet beneath snow.
4125 - Black, N. Pin Oak	Sawtimber Medium	5.8	81	81-110	
4310 - Pine, Oak Mix	Poletimber Well	9.7	77	81-110	
4130 - Aspen	Poletimber Medium	2.8	76	51-80	
6126 - Lowland Jack Pine	Poletimber Well	6.0	76	Unspecified	
42210 - Natural Red Pine	Sawtimber Well	4.8	74	111-140	
42290 - Natural Mixed Pine	Sawtimber Well	16.7	77	111-140	great site for red and white pine.
4123 - Red Oak	Poletimber Well	2.8	77	51-80	
42120 - Planted Jack Pine	Sapling Well	3.9	57	Unspecified	only one real row of rp.
4310 - Pine, Oak Mix	Sawtimber Well	5.5	77	51-80	
4130 - Aspen	Sapling Well	16.2	27	Immature	
4133 - Aspen, Mixed Pine	Sawtimber Well	8.8	74	Unspecified	more oak in the east end, more rp in the west
